Oregano The Genera Origanum And Lippia:

Oregano Spiridon E. Kintzios, 2002-08-29 Oregano The Genera Origanum and Lippia is an updated analysis of the technical knowledge and market information on the world's most commercially valuable spice. The book treats various aspects of practical significance for the crop's industrialization such as optimizing germplasm selection and utilization, novel cultivation methods and product processing, blending and uses in different countries along with other issues not included in previous reviews. Written by leading experts, every aspect of this plant genera is examined in detail. Information is provided on the structural dynamics of Origanum as well as analytical information on extraction, isolation and characterization. This helps the reader form a clear picture of the construction and operation of this specific genus. Extensively referenced with a special guide to electronic data retrieval strategies, this volume is the definitive source of information for anyone interested in the research and application of Oregano across both academia and industry.

Handbook of Spices in India: 75 Years of Research and Development P. N. Ravindran, K. Sivaraman, S. Devasahayam, K. Nirmal Babu, 2024-06-24 This compendium presents comprehensive information on more than 25 important spice crops commercially grown in India and traded globally, apart from over 40 spices that have the potential to be popularized. In 70 chapters, the book covers the achievements in research and development made in India for the past 75 years in various organizations including research institutes, agricultural universities and private sector laboratories. Spices are natural products of plant origin used primarily for flavouring and seasoning or for adding pungency and flavour to foods and beverages. The flavour and fragrance of Indian spices had a magic spell on human culture since very ancient days. The importance of spices in Indian life and its contribution to the economy are substantial. India as the world's leading producer of spices is also a significant stakeholder in spices export trade globally. Indian spices being sources of many high-value compounds are also gaining much importance for other diversified uses, especially for their pharmaceutical and nutraceutical properties. A wide variety of 52 spices are grown in India including black pepper, chillies, cardamom, ginger, turmeric, cinnamon, nutmeg, garlic, onion, cumin, coriander, saffron and vanilla. This book compiles a comprehensive holistic review on the subject, written by the best experts in the field in India, representing diverse agencies. This book is a single-point reference book for all those involved in the research, study, teaching and use of spices in India and abroad.
