An Entrenched Legacy Patrick M. Garry, 2010-11 An Entrenched Legacy takes a fresh look at the role of the Supreme Court in our modern constitutional system Although criticisms of judicial power today often attribute its rise to the activism of justices seeking to advance particular political ideologies Patrick Garry argues instead that the Supreme Court's power has grown mainly because of certain constitutional decisions during the New Deal era that initially seemed to portend a lessening of the Court's power When the Court retreated from enforcing separation of powers and federalism as the twin

structural protections for individual liberty in the face of FDR's New Deal agenda it was inevitably drawn into an alternative approach substantive due process as a means for protecting individual rights This has led to many controversial judicial rulings particularly regarding the recognition and enforcement of privacy rights It has also led to the mistaken belief that the judiciary serves as the only protection of liberty and that an inherent conflict exists between individual liberty and majoritarian rule Moreover because the Court has assumed sole responsibility for preserving liberty the whole area of individual rights has become highly centralized As Garry argues individual rights have been placed exclusively under judicial jurisdiction not because of anything the Constitution commands but because of the constitutional compromise of the New Deal During the Rehnquist era the Court tried to reinvigorate the constitutional doctrine of federalism by strengthening certain powers of the states But according to Garry this effort only went halfway toward a true revival of federalism since the Court continued to rely on judicially enforced individual rights for the protection of liberty A more comprehensive reform would require a return to the earlier reliance on both federalism and separation of powers as structural devices for protecting liberty Such reform as Garry notes would also help revitalize the role of legislatures in our democratic system

The Lewin Legacy Eugene Stivers, Susan Wheelan, 2012-12-06 I have attended quite a few conferences and meetings devoted to the ideas of Kurt Lewin Among these the 1984 conference at Temple was outstanding for its high quality What made it so successful Several things The conference included a stimulating mix of generations The first generation of women who obtained their Ph.D.s in psychology in Berlin in the 1920s strike me as a remarkable group Now in their 80s they are characterized by enormous vigor and energy They are still professionally active Two of them Tamara Dembo and Maria Rickers Ovsienkina joined us Other participants in the Temple conference had been in Iowa in the 1930s and 1940s or at MIT Of course there were many who had learned about Lewin from their own teachers and in some cases their teachers' teachers There was a good mixture of applied psychologists and academics Father said on several occasions that he did not want to found a school of psychology as such Rather he wanted to introduce the field theoretical viewpoint and approach I think he would have been stimulated by and enthusiastic about the many diverse areas to which Lewinian analyses ideas and concepts are applied today as illustrated by this volume He would have been pleased to see so many people applying basic theoretical concepts to important social problems Father loved to discover new things about America **Legacy of**

A Legacy of Leadership Clayton McClure Brooks, 2013-04-22 In A Legacy of Leadership top scholars and journalists create a new framework for understanding the contributions governors have made to defining democracy and shaping American history Structured chronologically A Legacy of Leadership places governors in contrast and comparison with one another as well as within the context of their times to show how a century of dramatic developments war and peace depression and prosperity led governors to rethink and expand their positions of leadership The nine chapters of compelling new scholarship presented here connect the experiences of dynamic individual governors and the evolution of the gubernatorial office to the broader challenges the United States has faced throughout the turbulent twentieth century Taken together they demonstrate how interstate cooperation became essential as governors increasingly embraced national and international perspectives to promote their own states competitiveness Published for the centennial of the National Governors Association A Legacy of Leadership is an eloquent demonstration of how to a great extent we live
