**Oregon's Iron Dream; a Story of Old Oswego...** Mary Goodall, **An Index to Oregon's Iron Dream** Mary Goodall,1958 **Oregon's Iron Dream** Mary Goodall,1958 **An Environmental History of the Willamette Valley** Elizabeth Orr,William Orr,2019-03-25 Western Oregon s Willamette Basin once a vast wilderness became a thriving community almost overnight When Oregon territory was opened for homesteading in the early 1800s most of the intrepid pioneers settled in the valley spurring rapid changes in the landscape Heralded as fertile with a mild climate and an abundance of natural resources the valley enticed farmers miners and loggers who were quickly followed by the construction of rail lines and roads Dams were built to harness the once free flowing Willamette River and provide power to the growing population As cities rose people like Portland architect Edward Bennett and conservationist governor Tom McCall worked to contain urban sprawl Authors Elizabeth and William Orr bring to life the changes that sculpted Oregon s beloved Willamette Valley **The Oregon Companion** Richard H. Engeman,2009-09-01 What s the connection between Ken Kesey and Nancy s Yogurt How about the difference between a hoedad and a webfoot What became of the Pixie Kitchen and the vanished Lambert Gardens The Oregon Companion is an A Z handbook of over 1000 people places and things From Abernethy and beaver money to houseboats railroads and the Zigzag River an intrepid public historian separates fact from fiction with his sense of humor intact Entries include towns and cities counties rivers lakes and mountains people who have left a mark on Oregon industries products crops and natural resources Includes more than 160 historical black and white photos This entertaining and delightfully meticulous compendium is an essential reference for anyone curious about Oregon [The Fallen Sky](#) Christopher Cokinos,2009-07-30 In this acclaimed volume prizewinning poet and nature writer Christopher Cokinos takes us on an epic journey from Antarctica to outer space weaving together natural history memoir and in depth profiles of amateur researchers rogue scientists and stargazing dreamers to tell the riveting tale of how the study of meteorites became a modern science **I-5, South Tigard Interchange, Boones Ferry Road Section (Kruse Way, FAS-943), Clackamas County** ,1975 *The Iron and Steel Industry in the Far West* Diane F. Britton,1991 Irondale a quiet residential community ten miles south of Port Townsend on the northeast corner of Washington s Olympic Peninsula was once home to a major West Coast iron and steel industry that lasted from 1881 to 1919 In its heyday especially 1909 1911 the town was a bustling commercial hub with daily ocean steamer traffic arriving and departing carrying hundreds of passengers and tons of cargo raw materials and finished products Though Irondale s future seemed promising in true boomtown fashion the town and its industry prospered and declined together Irondale s turbulent history reflects conditions faced by western entrepreneurs including stiff competition from established eastern cities The striving for financial profit and for a self sufficient economy free from eastern domination encouraged speculation and boosterism a theme found commonly throughout U S history Western growth during the late nineteenth and early twentieth century spurred a greater demand for

iron and steel materials used not only in household farming implements but also necessary for all types of structures and transportation facilities particularly railroads Diane Britton's impressively researched work greatly advances an understanding of community and industry building in the West. It provides the first narrative account of the rise and eventual demise of an integrated steelworks at Irondale. Examines the intimate relationship between the town and plant and places that local history into a larger regional and national context. **Lake Oswego** Laura O. Foster, 2009-10-26 Fifteen thousand years ago the Missoula floods roared out of the Columbia River Gorge and sculpted a lakebed out of an old river channel. In 1847 Albert Durham built a home and mill at the lake's outlet calling the area Oswego. In the 1860s iron ore mined from the surrounding hills gave rise to the hope that Oswego would become the Pittsburgh of the West. Two decades after its hillsides had been logged and the iron industry failed, the city reinvented itself as an elegant streetcar suburb of Portland, a place where people could live where they played. Oswego Lake's shores were soon lined with picturesque homes and pleasure boats and water skiers roamed its waters. Arcadia's Images of America Lake Oswego chronicles the town's bucolic beginnings, industrial heyday, and successful repurposing from a community based on resource extraction to one of Oregon's most beautiful towns. Renamed Lake Oswego after a 1960 merger with nearby Lake Grove

Carleton Watkins Tyler Green, 2020-10-20 A fascinating and indispensable book. Christopher Knight, Los Angeles Times Best Books of 2018. The Guardian Gold Medal for Contribution to Publishing 2018. California Book Awards. Carleton Watkins 1829-1916 is widely considered the greatest American photographer of the nineteenth century and arguably the most influential artist of his era. He is best known for his pictures of Yosemite Valley and the nearby Mariposa Grove of giant sequoias. Watkins made his first trip to Yosemite Valley and Mariposa Grove in 1861, just as the Civil War was beginning. His photographs of Yosemite were exhibited in New York for the first time in 1862, as news of the Union's disastrous defeat at Fredericksburg was landing in newspapers and while the Matthew Brady Studio's horrific photographs of Antietam were on view. Watkins's work tied the West to Northern cultural traditions and played a key role in pledging the once-wavering West to Union. Motivated by Watkins's pictures, Congress would pass legislation signed by Abraham Lincoln that preserved Yosemite as the prototypical national park, the first such act of landscape preservation in the world. Carleton Watkins Making the West American includes the first history of the birth of the national park concept since pioneering environmental historian Hans Huth's landmark 1948 Yosemite: The Story of an Idea. Watkins's photographs helped shape America's idea of the West and helped make the West a full participant in the nation. His pictures of California, Oregon, and Nevada, as well as modern-day Washington, Utah, and Arizona, not only introduced entire landscapes to America but were important to the development of American business, finance, agriculture, government policy, and science. Watkins's clients, customers, and friends were a veritable who's who of America's Gilded Age, and his connections with notable figures such as Collis P. Huntington, John and Jessie Benton Fremont, Eadweard Muybridge, Frederick Billings, John Muir, Albert Bierstadt, and

Asa Gray reveal how the Gilded Age helped make today's America Drawing on recent scholarship and fresh archival discoveries Tyler Green reveals how an artist didn't just reflect his time but acted as an agent of influence This telling of Watkins's story will fascinate anyone interested in American history the West and how art and artists impacted the development of American ideas industry landscape conservation and politics      **Tracking Down Oregon** Ralph
