**Intermediate Organic Chemistry** Michael Leonard, 2013-07-10 The mission of Intermediate Organic Chemistry is to bridge the gap between introductory Organic Chemistry coursework and advanced graduate level coursework but to do so in a way that extends the student centered approach of most modern introductory Organic Chemistry textbooks This text makes extensive use of detailed explanations and color coding to facilitate the learning process This text's style is one that is shared by many instructors of Organic Chemistry mechanistically driven and detailed Extensive use of color coding helps students to learn mechanism and cogently predict reaction products The electrons that are mechanistically involved in each transformation are color coded The mechanistic arrows originating from those electrons are colored identically as are the bonds and or lone pairs that result from the electron flow This approach along with detailed verbal explanations conveys the narrative of the mechanism
