Voltaire once said Happy is the man who has his own garden and true contentment is when he grows things in it Having your own garden may not be possible for many of us today busy in the rat race of the 21st century Nevertheless there are still many people fortunate enough to have open land outside their houses where they can make their own flower gardens or kitchen gardens This book is going to tell you how to make an organic kitchen garden for pleasure and also for profit Just like any other garden a little bit of planning has to go into making your vegetable garden It should have sufficient paths in it so that you can wheel about manures etc in barrows if necessary You may also want to remove all the green vegetal rubbish accumulating while gardening There is absolutely no need for your garden to be all paths if it is pocket sized and you are strapped for space In small gardens one path at one side is more than enough Whatever the size of your organic vegetable garden may be this book is going back to traditional methods of growing vegetables in a healthy manner We are not talking about chemical fertilizers and poisonous pesticides Instead we are going to talk about natural manure compost and other traditional methods used by our forefathers to get a good healthy crop for family and neighbors Many people out there would
