discussed in the first volume By reviewing historical developments in the literature around gender and organization and by drawing on recent scholarship that disrupts the traditional masculine imaginaries that plague leadership constructs this book challenges us to radically revise our gendered thinking about leading in organizations The authors included in this volume offer alternative interdisciplinary perspectives on the gender constructs that inform the organizing that takes place in business and society The book delves deeply into how relationality as concept and practice can help us frame a more inclusive approach to gender within contemporary organizations
