The book is divided into 18 chapters that are focused on the critical infrastructure sectors identified in the 2013 National Infrastructure Protection Plan (NIPP): election security and the security of local and state government. Each chapter features viewpoints from an assortment of former government leaders, C-level executives, academics and other cybersecurity thought leaders. Major cybersecurity incidents involving public sector systems occur with jarringly frequency; however, instead of rising in vigilant alarm against the threats posed to our vital systems, the nation has become desensitized and demoralized. This publication was developed to deconstruct the normalization of cybersecurity inadequacies in our critical infrastructures and to make the challenge of improving our national security posture less daunting and more manageable. To capture a holistic and comprehensive outlook on each critical infrastructure, each chapter includes a foreword that introduces the sector and perspective essays from one or more reputable thought leaders in that space on topics such as The State of the Sector, challenges, threats, etc. Emerging Areas for Innovation, Recommendations for the Future. 2021-2025 Cybersecurity Landscape.
