ASHE Reader on Organization and Governance in Higher Education Marvin W. Peterson, 1989 Organization and Governance in Higher Education Jason Lane, Eboni Zamani-Gallaher, 2010

Organization and Governance in Higher Education is one of the primary teaching and research references in the study and practice of post secondary education. Research in higher education has provided new insights and recommendations for the management of postsecondary institutions. In addition to maintaining the strength and integrity of prior readers by continuing the coverage of classical theories and traditional models, the Fifth Edition provides updated reading to broaden the scope of the reader. New selections include current perspective on campus governance and institutional change. Because of the complex nature of the postsecondary institution, this reader creates eight subject area lenses. Each lens allows the reader to engage the specific paradigms and phenomena related to that aspect of higher education.

the faculty profession What is it about the history of the professoriate in America that has rendered the collegium inadequate and yet so important in an age of differentiated labor How might a renewed vision for collegiality bring clarity to the question of which faculty should be regarded as experts How can we adapt and leverage these important concepts for a professoriate that is increasingly diverse by demographics and employment category in ways that result in a more inclusive and robust profession Engaging in these questions through the extant literature will call readers into a compelling new conversation about the needs of and possibilities for the professoriate This is the fourth issue of the 43rd volume of the Jossey Bass series ASHE Higher Education Report Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication
