

EMOTIONAL DEVELOPMENT

Emotional development refers to a person's improving ability to recognize, regulate, and express their feelings.

THEORIES

- **Attachment Theory:** Explores how students overcome their attachment to their parents and replace it with self-efficacy, self-confidence, and ability to self-regulate emotions.
- **Psychosocial Theory:** people emotionally develop through a series of stages in life. In each stage, we have a fundamental crisis to overcome.

EXAMPLES

- **Emerging ability to name feelings (7 to 24 months):** Toddlers develop the ability to name feelings like happy, sad, and scared.
- **Declining egocentrism (5 years and up):** Children will slowly move out of egocentric thinking from about age 5 and start to develop perspective-taking and empathy for others' viewpoints.

Handbook of Drug Abuse Prevention Zili Sloboda,William J. Bukoski,2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use
