Raising Happy Children Lizanne Du Plessis, 2014-06 Parenting in the 21st century is easy and exciting yet challenging and demanding We now know more about

how our children's brains develop than we've ever known before and this has profound implications for how we raise our children. Children develop strong brain connections and feel happy when they learn how to control their bodies, manage big overwhelming feelings, and develop their thinking skills. These important skills come more easily for some than for others, which also means that there is no one size fits all approach when it comes to parenting. Filled with stories, examples, and easy to understand analogies, **Raising Happy Children** will help you understand what is going on inside your child's developing body and brain. Your child's true nature and how this affects the way he thinks, feels, and behaves. You'll also find lots of fun games you can play during your day to day interaction, crucial in the development of your child's ability to regulate his body and develop his thinking in the midst of big overwhelming feelings. In this book, Lizanne also gives step by step ways to deal with some of the most common parenting struggles as they relate to your unique child, such as Meltdowns, Temper tantrums, Fears, anxieties, and stress. Once you understand your unique child, you'll be ready to set appropriate boundaries and put rituals and routines in place that will guarantee a calm, happy, and deeply connected family.

How To Bring Up Happy Children Saamdu Chetri, What is the one thing every parent wants for their child? The universal answer: To be happy. **How to Bring Up Happy Children** based on the Gross National Happiness principles of the small Himalayan Kingdom of Bhutan, is about bringing life transformative changes to young families. Saamdu Chetri uses his decades of experience in working with Bhutan's Gross National Happiness concept and disseminating its principles to the world to explain how parents who are content and grounded in the nine domains of human existence enable the raising of happy children who have the natural ability to live in harmony with themselves, others, nature, and the greater universe. From young couples preparing for parenthood to middle aged parents navigating the difficult stages of confusion and inner conflict with their young adult children, this book spans every age and stage, helping every parent, caregiver, to understand how nature and nurture blend in the evolution of a child to his/her highest potential. A life long teacher, ecologist, philosopher, and life guide, Chetri guides parents on how to influence natural selection, how to gain a new perspective on collective and time tested wisdom on thinking and doing, how to create standard life practices that encompass every domain of human life, how to break free of entrenched mindsets and habits, and go beyond, and how to achieve both happiness and human potential. These valuable lessons in mindfulness open the door to an organic understanding of how to live as parents in a society and raise happy children who in turn contribute to creating a better world.
