**Hypnotizing Maria** Richard Bach, 2009-09-18 This philosophical novel mines the same territory as *The Secret* but is far richer raising provocative questions Publishers Weekly Flight instructor Jamie Forbes guides a woman to landing her plane safely after her husband loses consciousness then flies on to his own destination unimpressed by his act flight instructors guide students every day Only after she tells reporters that a stranger appeared in an airplane alongside hers and hypnotized her into landing and after he meets his own guiding stranger does he solve the bigger mystery how each of us creates step by step what seems to be the solid world around us The best mysteries are the ones whose answers lie in front of us in plain sight The best solutions are those moments when all of a sudden we realize what we've known all along

**The A to Z of Fantasy Literature** Brian Stableford, 2009-08-13 Once upon a time all literature was fantasy set in a mythical past when magic existed animals talked and the gods took an active hand in earthly affairs As the mythical past was displaced in Western estimation by the historical past and novelists became increasingly preoccupied with the present fantasy was temporarily marginalized until the late 20th century when it enjoyed a spectacular resurgence in every stratum of the literary marketplace Stableford provides an invaluable guide to this sequence of events and to the current state of the field The chronology tracks the evolution of fantasy from the origins of literature to the 21st century The introduction explains the nature of the impulses creating and shaping fantasy literature the problems of its definition and the reasons for its changing historical fortunes The dictionary includes cross referenced entries on more than 700 authors ranging across the entire historical spectrum while more than 200 other entries describe the fantasy subgenres key images in fantasy literature technical terms used in fantasy criticism and the intimately convoluted relationship between literary fantasies scholarly fantasies and lifestyle fantasies The book concludes with an extensive bibliography that ranges from general textbooks and specialized accounts of the history and scholarship of fantasy literature through bibliographies and accounts of the fantasy literature of different nations to individual author studies and useful websites

**Flying** Richard Bach, 2003-10-29 Here for the first time in a single volume are three of Richard Bach's most compelling works about flight From his edgy days as a USAF Alert pilot above Europe in an armed F84 F Thunderstreak during the Cold War to a meander across America in a 1929 biplane Bach explores the extreme edges of the air his airplane and himself in glorious writing about how it feels to climb into a machine leave the earth and fly Only a handful of writers have translated their experiences in the cockpit into books that have mesmerized generations

**Wild Life** Irus Braverman, 2015-04-22 Wild Life documents a nuanced understanding of the wild versus captive divide in species conservation It also documents the emerging understanding that all forms of wild nature both in situ on site and ex situ in captivity may need to be managed in perpetuity Providing a unique window into the high stakes world of nature conservation Irus Braverman describes the heroic efforts by conservationists to save wild life Yet in the shadows of such dedication and persistence in saving the life of species Wild Life also finds sacrifice and death Such life and death stories outline the modern struggle to define what conservation should look like at a time when the long established definitions of nature have collapsed Wild Life begins with the plight of a tiny endangered snail and ends with the rehabilitation of an entire island Interwoven between its pages are stories about golden lion tamarins in Brazil black footed ferrets in the American Plains Sumatran rhinos in Indonesia Tasmanian devils in Australia and many more creatures both human and nonhuman Braverman draws on interviews with more than one hundred and twenty conservation biologists zoologists zoo professionals government officials and wildlife managers to explore the various perspectives on in situ and ex situ conservation and the blurring of the lines between them

*Averting Extinction* Timothy W. Clark, Susan Gail Clark, 2005-05-01 The black footed ferret once thought extinct was rediscovered in Wyoming in 1981 In this book Tim Clark tells the story of subsequent efforts to save the black footed ferret showing how it points up the necessity of finding new ways to conserve and restore species According to Clark the problems facing conservation are not fundamentally biological but stem from human systems policy decisions organizational priorities and professional rivalries The focus in conservation he says must shift from science to practical problem solving Clark first describes and analyzes efforts to restore the black footed ferret after 1981 and looks at the processes people institutions and programs that were involved in that endeavor Finding that the ferret case illustrates many things that go wrong in the implementation of complex environmental policy Clark then proposes fresh approaches to endangered species recovery He gives guidelines for improving decisionmaking and development of policies for devising organizational strategies and structures that are more conducive to learning and for a new civic professionalism that will raise the standards for performance and better meet society's needs This policy oriented approach he contends will open up new avenues methods and hope for species recovery A very important work that will be widely read discussed and argued Steven J Bissell Colorado
