Exception, and Digital Media Law Lyombe S. Eko, 2013-07-10 This volume explores the sameness and difference between

the United States and France in the matters of freedom of expression on the Internet The United States and France are liberal democracies that are part of the Western family of nations However despite their many similarities they have a number of cultural and ideological differences The United States is generally France's ally in time of war and its cultural nemesis in time of peace One of the reasons for this unusual relationship is that the United States and France are self-described exceptional countries The United States and France are therefore two Western countries separated by different exceptionalist logics Lyombe Eko uses this concept of exceptionalism as a theoretical framework for the analysis of American and French resolution of problems of human rights and freedom of expression in the traditional media and on the Internet This book therefore analyzes how each country applies rules and regulations designed to manage a number of issues of media communication in real space to the realities and specificities of cyberspace within the framework of their respective exceptionalist logics The fundamental question addressed concerns what happens when rules and regulations designed to regulate the media in clearly defined national and regional geographic spaces are suddenly confronted with the new realities and multi communication platforms of the interconnected virtual sphere of cyberspace English Lexicology Leonhard Lipka, 2002 **Random House Essential French Dictionary** Francesca L. V. Langbaum, 1997-01-01 *Anglicisms, Neologisms and Dynamic French* Michael D. Picone, 1996-10-18 This comprehensive study of Anglicisms in the context of accelerated neological activity in Contemporary Metropolitan French not only provides detailed documentation and description of a fascinating topic but opens up new vistas on issues of general linguistic interest the effects of technology on language the analyticity/syntheticity controversy the lexical contribution to language vitality the study of compound word formation the interplay between cultural and linguistic affectivity By investigating the dynamics of borrowing within the larger framework of general neological productivity and by bringing to bear cognitive and pragmatic considerations a much needed fresh approach to the entire question of Anglicisms takes shape All pertinent phenomena regarding Anglicisms in French a topic which continues to command the attention of language commentators and defenders in France and elsewhere are explored integral borrowings semantic calques structural calques the generation of pseudo Anglicisms and hybrids graphological and phonological phenomena In each case the phenomenon is investigated in the proper context of its interaction with other pertinent neological phonological and sociocultural developments These include general changes in French compound word formation modified derivational dynamics the microsystem of pseudo Classical morphology historic phonological instabilities the pressure for more synthetic types of lexical production in relation to the needs of technology and society Rather than adhering rigidly to any single theoretical model there is an attempt to set up a dialog between differing models in order to arrive at a multidimensional view of the phenomena investigated **A Biblical Theology of Gerassapience** Joel A. A. Ajayi, 2010 Ancient cultures such as that of the Hebrews commonly associated wisdom with advanced years In A Biblical Theology of Gerassapience the author investigates the validity of this correlation through an

eclectic approach including linguistic semantic tradition historical and socio anthropological methods to pertinent biblical and extra biblical texts There are significant variations in the estimation of gerassapience or old age wisdom in each period of ancient Israel s life that is in pre monarchical monarchical and post monarchical Israel Throughout this study appropriate cross cultural parallels are drawn from the cultures of ancient Israel s neighbors and of modern societies such as the West African Yoruba tribe The overall results are bi dimensional On the one hand there are semantic elements of gerassapience such as the elusiveness of wisdom and the mild fluidity of old age Both terms have strong contextual affinity with minimal exceptions Thus the attribution of wisdom to old age is evident but not absolute in the Hebrew Bible Old Testament On the other hand gerassapience is depicted as primarily didactic through direct and indirect instructions and counsels of the elderly fostering the saging fear of Yahweh legacies On the whole socio anthropocentric tendencies of gerassapience that is of making old age a repertoire of wisdom are checked by theological warrants of theosapience Yahwistic wisdom Therefore in the Hebrew Bible the fear of Yahweh is also the beginning of growing old and wise
