Pervasive Prejudice? Ian Ayres, 2003-10-15 If you re a woman and you shop for a new car will you really get the best deal If you re a man will you fare better If you re a black man waiting to receive an organ transplant will you have to wait longer than a white man In *Pervasive Prejudice* Ian Ayres confronts these questions and more In a series of important studies he finds overwhelming evidence that in a variety of markets retail car sales bail bonding kidney transplantation and FCC licensing blacks and females are consistently at a disadvantage For example when Ayres sent out agents of different races and genders posing as potential buyers to more than 200 car dealerships in Chicago he found that dealers regularly charged blacks and women more than they charged white men Other tests revealed that it is commonly more difficult for blacks than whites to receive a kidney transplant because of federal regulations Moreover Ayres found that minority male defendants are frequently required to post higher bail bonds than their Caucasian counterparts Traditional economic theory predicts that free markets should drive out discrimination but Ayres s startling findings challenge that position Along with empirical research Ayres offers game theoretic and other economic methodologies to show how prejudice can enter the bargaining process even when participants are supposedly acting as rational economic agents He also responds to critics of his previously published studies included here These studies suggest that race and gender discrimination is neither a thing of the past nor merely limited to the handful of markets that have been the traditional focus of civil rights laws

Red Zones Marie-Eve Sylvestre, Nicholas Blomley, Céline Bellot, 2020-01-02 In *Red Zones* Marie Eve Sylvestre Nicholas Blomley and Céline Bellot examine the court imposed territorial restrictions and other bail and sentencing conditions that are increasingly issued in the context of criminal proceedings Drawing on extensive fieldwork with legal actors in the criminal justice system as well as those who

have been subjected to court surveillance the authors demonstrate the devastating impact these restrictions have on the marginalized populations the homeless drug users sex workers and protesters who depend on public spaces On a broader level the authors show how red zones unlike better publicized forms of spatial regulation such as legislation or policing strategies create a form of legal territorialization that threatens to invert traditional expectations of justice and reshape our understanding of criminal law and punishment

Military Law Review , 1970 **Federal Probation** , 1993 *The Democracy That Never Was* Gary Teeple, 2025-02-28 Liberal democracy is usually treated as an independent variable as possessing the absolutes of democratic rule Its variable forms changing principles and practice and conscious destruction by its own advocates in particular the United States however suggest that it is not what it appears to be This book argues that it is a dependent variable the political form required by the changing configurations of national capital and their countervailing forces The forms of liberal democracy have always shifted in concert with the mode of production as their premise The absolutes of liberal democracy the author

contents have never been anything but the abstracted principles of the marketplace Their nature has now become especially visible for what they have been because the premise as national capital development has changed leaving liberal democracy as a form without its original content and its present content out of keeping with a national jurisdiction As a political form it persists but its role has been transformed from the regulation of national capital accumulation to the enforcer of the demands of global configurations of capital It is a role that its citizens implicitly understand as revealed in widespread political cynicism decreasing electoral participation and declining legitimacy that require ever greater measures of deceit from political leaders and increased means of coercive social control including militarized police forces and pervasive electronic surveillance There can be no going back to the stage of national politics because the neoliberal content of liberal democratic policies represents the necessities of global capital And it is the contradictions of global capital that define the character of early 21st century political conflict
