Los Angeles Magazine , 2000-12 Los Angeles magazine is a regional magazine of national stature Our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define Southern California Started in the spring of 1961 Los Angeles magazine has been addressing the needs and interests of our region for 48 years The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian

Private Landscapes Pamela Burton, Marie Botnick, 2002 When we think of the gardens of Southern California we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos often built on the sprawling grounds of former ranches But there is another garden tradition in Southern California the modest rectangular suburban plots designed by the most famous architects of mid century modernism Richard Neutra Rudolph Schindler Gregory Ain Raphael Soriano Harwell Hamilton Harris A Quincy Jones and John Lautner These architects saw the garden as an outdoor extension of the space of the houses they designed rather than a neo Spanish fantasy to be added later by a landscapist Their modern gardens made use of low maintenance drought resistant plants and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise The first book of its kind *Private Landscapes* profiles twenty significant gardens and their accompanying houses by these celebrated architects Using contemporary photographs by Julius Shulman and newly commissioned color images along with plans and plant lists *Private Landscapes* provides a never before seen look at these gardens As beautiful and practical now as they were 50 years ago these designs continue to provide inspiration for gardeners and designers everywhere

The Urban Condition Ghent Urban Studies Team, 1999 What does the Western city at the end of the twentieth century look like How did the modern metropolis of congestion and density turn into a posturban or even postsuburban cityscape What are edge cities and technoburbs How has the social composition of cities changed in the postwar era What do gated communities tell us about social fragmentation Is public space in the contemporary city being privatized and militarized How can the urban self still be defined What role does consumer aestheticism have to play in this

These and many more questions are addressed by this uniquely conceived multidisciplinary study The Urban Condition seeks to interfere in current debates over the future and interpretation of our urban landscapes by reuniting studies of the city as a physical and material phenomenon and as a cultural and mental arte fact The Ghent Urban Studies Team responsible for the writing and editing of this volume is directed by Kristiaan Versluys and Dirk De Meyer at the University of Ghent Belgium It is an interdisciplinary research team of young academics that further consists of Kristiaan Borret Bart Eeckhout Steven Jacobs and Bart Keunen The collective expertise of GUST ranges from architectural theory urban planning and art history to philosophy literary criticism and cultural theory

Pierre Koenig Neil Jackson, 2019-02-05 A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig a key figure of the Los Angeles Modernist movement In this remarkable and gorgeously illustrated book Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig who Time magazine said lived long enough to become cool twice From the influences of Koenig's youth in San Francisco and his military service during World War II to the Case Study Houses and his later award laden years Jackson's study plots the evolution of Koenig's oeuvre against the backdrop of Los Angeles a city that both shaped and was shaped by his architecture The book is anchored by Jackson's exciting discoveries in Koenig's archive at the Getty Research Institute Drawings photographs diaries letters lecture notes building contracts and university projects many of which are published for the first time provide an expanded understanding of Koenig and additional context for his architectural achievements An examination

of Koenig's Case Study Houses shows how his often single minded and pragmatic approach to domestic architecture recognized the advantages of production housing and presciently embraced sustainable ecologically responsible design A new account of the Chemehuevi housing project in Havasu Lake California demonstrates the special role that learning and teaching played in the development of his architecture Over his fifty year career Koenig not only designed iconic houses but also directed their restoration and curated their legacy ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles

NorCalMod Pierluigi Serraino,2006-08-03 Many people think modernist architecture never flowered in California north of the San Fernando Valley *NorCalMod* dispels that notion in a copiously illustrated history showcasing extraordinary examples of its proud contribution to the Bay Area and environs As a style modernist architecture was hotly debated in its day why create modern structures where such distinctive Victorian and Arts and Crafts buildings already existed pulling heavyweights such as Frank Lloyd Wright Lewis Mumford and Walter Gropius into the fray Ultimately that existing Bay Region Style would remain the area s architectural hallmark but not before hundreds of important modernist projects many still standing yet unjustly neglected today had been established The remarkable photos in this book open our eyes to a long lost chapter in the history of California architecture and make *NorCalMod* a volume to be enjoyed by those interested in California history and style as well as by architecture students and professionals **Building Art** Paul Goldberger,2017-11-14 From Pulitzer Prize winning critic Paul Goldberger a full fledged critical biography of Frank Gehry undoubtedly the most famous architect of our time Fascinating An informative startling journey into the inner sanctums of modern architecture s power structure The New York Times Book Review Riveting Full of little known facts about the Pritzker Prize winner that will surprise the most knowledgeable Gehry philes Architectural Digest Goldberger follows Gehry from his humble origins the son of working class Jewish immigrants in Toronto to the heights of his extraordinary career He explores Gehry s relationship to Los Angeles a city that welcomed outsider artists and profoundly shaped him in his formative years He surveys the full range of his work from the Bilbao Guggenheim to the Walt Disney Concert Hall in L A to the architect s own home in Santa Monica which galvanized his neighbors and astonished the world He analyzes his carefully crafted persona in which an amiable surface masks a driving ambition And he discusses his use of technology not just to change the way a building looks but to revolutionize the very practice of the field Comprehensive and incisive **Building Art** is a sweeping view of a singular artist and an essential story of architecture s modern era **Architectural Regionalism** Vincent B. Canizaro,2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism But despite its omnipresence in contemporary practice and theory architectural regionalism remains a fluid concept its historical development and current influence largely undocumented This comprehensive reader brings together over 40 key essays

illustrating the full range of ideas embodied by the term. Authored by important critics, historians, and architects such as Kenneth Frampton, Lewis Mumford, Sigfried Giedion, and Alan Colquhoun, *Architectural Regionalism* represents the history of regionalist thinking in architecture from the early twentieth century to today. *Hut, Pavilion, Shrine: Architectural Archetypes in Mid-Century Modernism* Miles David Samson, 2016-03-09 The phase of American architectural history we call mid-century modernism, 1940-1980, saw the spread of Modern Movement tenets of functionalism, social service, and anonymity into mainstream practice. It also saw the spread of their seeming opposites: temples, arcades, domes, and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s. *Hut, Pavilion, Shrine* examines this crossroads of modernism and the archetypal and critiques its buildings and theory. The book centers on one particularly important and omnipresent type, the pavilion, a type which was the basis of major work by Louis I. Kahn, Paul Rudolph, Philip Johnson, Minoru Yamasaki, and other eminent architects. While focusing primarily on the architecture culture of the United States, it also includes the work of British, European, Team X, and Scandinavian designers and writers. Making connections between formal analysis, historical context, and theory, the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism's forbidden elements of the honorific and the visually pleasurable. It highlights the significance of pavilionizing mid-century designers such as Victor Lundy, John Johansen, Eero Saarinen, and Edward Durrell Stone, and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive-in restaurants, gas stations, furniture, and car showrooms, branch banks, and motels. The book ties together the threads in mid-century architectural theory that addressed aspects of type, essential structure, and primal humanistic aspects of environment making, and discusses how these concerns outlived the mid-century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism.
