Disputed Decisions of World War II Mark Thompson, 2020-01-17 A former Harvard professor of decision science and game theory draws on those disciplines in this review of controversial strategic and tactical decisions of World War II Allied leaders although outstanding in many ways sometimes botched what now is termed meta decision making or deciding how to decide. Operation Jubilee a single division raid on Dieppe France in August 1942 for example illustrated the pitfalls of groupthink. In the Allied invasion of North Africa three months later American and British leaders fell victim to the planning fallacy having unrealistically rosy expectations of an easy victory. In Sicily in the summer of 1943 they violated the millennia old principle of command unity now re-endorsed and elaborated on by modern theorists. Had Allied strategists understood the game theory of bluffing in January 1944 they might well not have landed two plus divisions at Anzio in Italy. Proceedings of Italian Concrete Days 2016 Marco di Prisco, Marco Menegotto, 2018-04-16 This book gathers the best peer reviewed papers presented at the Italian Concrete Days national conference held in Rome Italy on October 27-28 2016. The conference topics encompass the aspects of design execution rehabilitation and control of concrete structures with particular reference to theory and modeling applications and realizations materials and investigations technology and construction techniques. The contributions amply demonstrate that today's structural concrete applications concern not only new constructions but more and more rehabilitation conservation strengthening and seismic upgrading of existing premises and that requirements cover new aspects within the frame of sustainability including environmental friendliness durability adaptability and reuse of works and/or materials. As such the book represents an invaluable up to the minute tool providing an essential overview of structural concrete as well as all new materials with cementitious matrices. *Risk Modeling, Assessment, and Management* Yacov Y.
