**Epistemology and Emotions** Georg Brun,Ulvi Doguoglu,2016-04-29 Undoubtedly emotions sometimes thwart our epistemic endeavours But do they also contribute to epistemic success The thesis that emotions skew the epistemic landscape as Peter Goldie puts it in this volume has long been discussed in epistemology Recently however philosophers have called for a systematic reassessment of the epistemic relevance of emotions The resulting debate at the interface between epistemology theory of emotions and cognitive science examines emotions in a wide range of functions These include motivating inquiry establishing relevance as well as providing access to facts beliefs and non propositional aspects of knowledge This volume is the first collection focusing on the claim that we cannot but account for emotions if we are to understand the processes and evaluations related to empirical knowledge All essays are specifically written for this collection by leading researchers in this relatively new and developing field bringing together work from backgrounds such as pragmatism and scepticism cognitive theories of emotions and cognitive science Cartesian epistemology and virtue epistemology

**Being and Freedom** John Skorupski, 2021-04-08 Being and Freedom is a panoramic account of ethics in Europe from the French Revolution to the end of the nineteenth century In this period the influence of ethics ran far beyond philosophy eventually dominating politics and religion in the West Developments came from France Germany and Britain this is the first book to treat them together as a Europe wide phenomenon paying attention to the context of events and ideas from which they emerged Skorupski begins by examining the philosophical conflict at the heart of the French revolution between the individualism of the Enlightenment and two very different forms of holistic ethics the old regime's ethic of service and the radical democracy of the Rousseauian left Responses analysing freedom and modern social relations came from a series of French liberal thinkers In Germany the reaction was to two revolutions seen as inaugurating modernity the political revolution in France and the philosophical revolution of Kant Here the fate of religion was critical and with it the metaphysics of being and freedom Skorupski traces this story from Kant to Hegel's idealist version of ethical holism In Britain Enlightenment naturalism remained the prevailing framework It took different forms common sense and the theory of the sentiments in Scotland utilitarianism in England From all these elements came a synthesis of European themes by John Stuart Mill comparable in range but opposed to that of Hegel The final chapter is an assessment of this period's ethical ideas They remain the core of late modern ethics and the contested ground on which ethical disagreements take place today

**A Theory of Nonviolent Action** Stellan Vinthagen, 2015-11-15 In this ground breaking and much needed book Stellan Vinthagen provides the first major systematic attempt to develop a theory of nonviolent action since Gene Sharp's seminal *The Politics of Nonviolent Action* in 1973 Employing a rich collection of historical and contemporary social movements from various parts of the world as examples from the civil rights movement in America to anti Apartheid protestors in South Africa to Gandhi and his followers in India

and addressing core theoretical issues concerning nonviolent action in an innovative penetrating way Vinthagen argues for a repertoire of nonviolence that combines resistance and construction Contrary to earlier research this repertoire consisting of dialogue facilitation normative regulation power breaking and utopian enactment is shown to be both multidimensional and contradictory creating difficult contradictions within nonviolence while simultaneously providing its creative and transformative force An important contribution in the field A Theory of Nonviolent Action is essential for anyone involved with nonviolent action who wants to think about what they are doing     After Politics Glen Newey,2000-12-18 Why do political philosophers why away from politics After Politics The Rejection of Politics in Contemporary Liberal Philosophy offers a challenging and original critique of liberalism the dominant political philosophy of our time tackling key issues like state legitimacy value pluralism neutrality the nature of politics public reasons and morality in politics Analyzing major liberal theorists like Rawls Habermas Rorty Barry Gray Raz Larmore Ackerman and others Glen Newey argues that liberalism by passes politics because it ignores or misunderstands human motivation and elevates academic system building over political realities of conflict and power     Love, Friendship, and the Self Bennett W. Helm,2010-01-07 Bennett Helm presents a reexamination of our common understanding of ourselves as persons in light of the phenomena of love and friendship He argues that the individualism that is implicit in that understanding cannot be sustained if we are to understand the kind of distinctively personal intimacy that love and friendship essentially involve     Normative Reasons and Theism Gerald K. Harrison,2018-06-06 Normative reasons are reasons to do and believe things Intellectual inquiry seems to presuppose their existence for we cannot justifiably conclude that we exist that there is an external world and that there are better and worse ways of investigating it and behaving in it unless there are reasons to do and believe such things But just what in the world are normative reasons In this book a case is made for believing normative reasons are favouring relations that have a single external source filling this significant gap in the literature in an area within contemporary philosophy that has quickly grown in prominence Providing a divine command metanormative analysis of normative reasons on entirely non religious grounds its arguments will be relevant to both secular and non secular audiences alike and will address key issues in meta ethics evolutionary theory especially evolutionary debunking threats to moral reasons and the normative more generally and epistemology     The Political Economy of Destructive Power Mehrdad Vahabi,2004-01-01 This book will appeal to a broad and varied readership from a range of disciplines across the social sciences including economics politics sociology history and psychology BOOK JACKET
