

The background of the cover features a series of horizontal bars in various colors (purple, yellow, blue, green, red, orange, brown, etc.) that are partially obscured by a pixelated, staircase-like structure. The structure is composed of small squares in the same color palette, creating a stepped effect that descends from left to right. The title is centered over this graphic.

Rational Choice Theory Resisting Colonisation:

Rational Choice Theory Margaret Scotford Archer, Jonathan Q. Tritter, 2000 The fascinating title focuses on the four assumptions which are the bedrock of rational choice rationality individualism process and aggregation and draws on a wide range of social issues such as race marriage health education **On Sociology Second Edition Volume One** John H. Goldthorpe, 2007 Looking to unify increasingly disparate areas of theory and research John Goldthorpe presents a new mainstream combining the demonstrated strengths of large scale quantitative research and the explanatory power of social action theory Rational Choice Theory Margaret S. Archer, Jonathan Q. Tritter, 2013-04-03 Rational Choice Theory is flourishing in sociology and is increasingly influential in other disciplines Contributors to this volume are convinced that it provides an inadequate conceptualization of all aspects of decision making of the individuals who make the decisions of the process by which decisions get made and of the context within which decisions get made The critique focuses on the four assumptions which are the bedrock of rational choice rationality the theory's definition of rationality is incomplete and cannot satisfactorily incorporate norms and emotions individualism rational choice is based upon atomistic individual decision makers and cannot account for decisions made by couples groups or other forms of collective action process the assumption of fixed well ordered preferences and perfect information makes the theory inadequate for situations of change and uncertainty aggregation as methodological individualists rational choice theorists can only view structure and culture as aggregates and cannot incorporate structural or cultural influences as emergent properties which have an effect upon decision making The critique is grounded in discussion of a wide range of social issues including race marriage health and education **The New Palgrave Dictionary of Economics** , 2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product **Making Realism Work** Bob Carter, Caroline New, 2005-10-09 In this innovative book theorists and researchers from various social science disciplines explore the potential of realist social theory for empirical research The examples are drawn from a wide range of fields health and medicine crime housing sociolinguistics development theory and deal with issues such as causality probability and reflexivity in social science Varied and lively contributions relate central methodological issues to detailed accounts of research projects which adopt a realist framework Making Realism Work provides an accessible discussion of a significant current in contemporary social science and will be of interest to social theorists and social researchers alike **Making our Way through the World** Margaret S. Archer, 2007-06-14 How do we reflect upon ourselves and our concerns in relation to society and vice versa Human reflexivity works through internal conversations using language but also emotions sensations and images Most people acknowledge this inner dialogue and can report upon it However little research has been conducted

on internal conversations and how they mediate between our ultimate concerns and the social contexts we confront In this book Margaret Archer argues that reflexivity is progressively replacing routine action in late modernity shaping how ordinary people make their way through the world Using interviewees life and work histories she shows how internal conversations guide the occupations people seek keep or quit their stances towards structural constraints and enablements and their resulting patterns of social mobility

Race, Housing and Community Harris Beider, 2012-03-12 This book provides an important new contribution to debates around housing policy and its impact on community cohesion There has never been a more prescient time to discuss these concepts the book provides an interpretation of housing race and community cohesion in a highly politicized and fluid policy context It is designed to initiate discussion and debate but this should not be esoteric and limited to a group of academics Rather the objective is to bridge academic and policy audiences in the hope that this fusion provides a basis for a new agenda to discuss these topics Race and community have been key features of social housing policy over the last 20 years with many high profile interventions from the proactive approach by the Housing Corporation to support black and minority ethnic housing associations to the influential Cantle Report documenting segregation in towns and cities following riots and the National Housing Federation led Race Housing Inquiry leading to sector wide recommendations to achieve equality However volume of policy interventions and reports has not been matched by academic outputs that co ordinate integrate and critically analyse race housing and community Housing Race Community Cohesion is the first systematic overview of race housing and community during this tumultuous period The material presented is robust and research based but also directly engages with issues around policy and delivery It is designed to reflect the interests both of the academic research community and policy makers on both sides of the Atlantic It is not rooted to specific policy interventions that could quickly date but instead focuses on developing new ways to analyse difficult issues that will help both students and practitioners now and in the future

Modern Couples? Jenny van Hooff, 2016-04-15 Have heterosexual relationships become more intimate and equal over the past forty years Simply put this is the central question underpinning this book Within the context of late modern social processes including most notably individualization and detraditionalization authors such as Giddens Beck and Beck Gernsheim and Bauman have come to focus on a posited transformation of personal relationships This has culminated in a sociological debate over the nature of contemporary relationships with proponents of change celebrating the emergence of an intimacy based on personal satisfaction rather than traditional obligations Detractors reject this interpretation and instead lament what they consider to be the destruction of commitment and the demoralisation of personal relationships by the rise of individualism and consumerism While these two entrenched positions have dominated the debate a third marginalised perspective has emerged which questions the extent to which contemporary relationships have become detraditionalized and emphasises evidence of continuing gender inequalities This book is essentially a qualitative empirical investigation of the changes and continuities posited within the debate which evaluates existing work and details the findings of van Hooff s research into the relationships of two generations of heterosexual couples It provides the reader with a grounded interpretation of the evidence questioning to what extent lived reality has matched the rhetoric within contemporary relationships

Resistance in the Iberian Worlds from the Fifteenth to the Eighteenth Century Pablo Sánchez León, Benita Herreros Cleret de Langavant, 2024-10-01 This book highlights the broad scope and span of resistance as a contentious practice in the early modern Iberian world In this context from the late Middle Ages onwards resistance rooted in the political and legal language of the old regime that provided agents with legitimacy and resources for their actions occurred mainly within the established jurisdictional system These resources for litigation and demand made resistance a widespread kind of contesting practice related to wider protests The authors assess the wide array of actions developed by individuals and communities to preserve their rights and identities demonstrating how the Portuguese and Hispanic polities and their colonial possessions experienced resistance from below over a long period of change that marked the rise of more complex communities and institutional systems This book offers a comprehensive overview of the variety of forms and expressions of resistance developed in different social cultural and territorial contexts thus shedding additional light on the relationship between order and conflict within early modern European empires Chapter 3 is available open access under a Creative Commons Attribution 4 0 International License via link.springer.com

Beyond Relativism Cynthia Lins Hamlin, 2004-01-14 This book argues that critical realism offers the theory of cognitive rationality a real way of overcoming the limitations of methodological individualism by recognising both the agents and the social structure s causal powers and liabilities Cynthia Lins Hamlin persuasively argues that critical realism represents a better safeguard against the relativism which springs from the conflation of social reality and our ideas

about it This is an important book for sociologists and anyone working in the social sciences and for all those concerned with the methodology and philosophy of social science

Structure, Culture and Agency Tom Brock, Mark Carrigan, Graham Scambler, 2016-11-10

Professor Margaret Archer is a leading critical realist and major contemporary social theorist This edited collection seeks to celebrate the scope and accomplishments of her work distilling her theoretical and empirical contributions into four sections which capture the essence and trajectory of her research over almost four decades Long fascinated with the problem of structure and agency Archer's work has constituted a decade long engagement with this perennial issue of social thought However in spite of the deep interconnections that unify her body of work it is rarely treated as a coherent whole This is doubtless in part due to the unforgiving rigour of her arguments and prose but also a byproduct of sociology's ongoing compartmentalisation This edited collection seeks to address this relative neglect by collating a selection of papers spanning Archer's career which collectively elucidate both the development of her thought and the value that can be found in it as a systematic whole This book illustrates the empirical origins of her social ontology in her early work on the sociology of education as well as foregrounding the diverse range of influences that have conditioned her intellectual trajectory the systems theory of Walter Buckley the neo Weberian analysis of Lockwood the critical realist philosophy of Roy Bhaskar and more recently her engagement with American pragmatism and the Italian school of relational sociology What emerges is a series of important contributions to our understanding of the relationship between structure culture and agency Acting to introduce and guide readers through these contributions this book carries the potential to inform exciting and innovative sociological research
