Returning To The Body:

Anacarnation and Returning to the Lived Body with Richard Kearney Brian Treanor, James L. Taylor, 2022-10-26 This edited collection responds to Richard Kearney's recent work on touch, incarnation and embodiment as well as his broader work in carnal hermeneutics which sets the stage for his return to and retrieval of the senses of the lived body. Here fourteen scholars engage the breadth and depth of Kearney's work to illuminate our experience of the body. The chapters collected within take up a wide variety of subjects from nature and non-human animals to our experience of the sacred and the demonic and from art's account of touching to the political implications of various types of embodiment. Featuring also an inspired new reflection from Kearney himself in which he lays out his vision for anacarnation, this volume is an important statement about the centrality of touch and embodiment in our experience and a reminder that despite the incarnating tendencies of contemporary life, the lived body remains a touchstone for wisdom in our increasingly complicated and fragile world. Written for scholars and students interested in touch, embodiment, phenomenology and hermeneutics, this diverse and challenging collection contributes to a growing field of scholarship that recognizes and attempts to correct the incarnating trends in philosophy and in culture at large.

The Reception of Plato's <Phaedrus> from Antiquity to the Renaissance Sylvain Delcomminette, Pieter d'Hoine, Marc-Antoine Gavray, 2020-07-06 This volume explores the tremendous influence of Plato's *Phaedrus* on the philosophical, religious, scientific and literary discussions in the West. Ranging from Plato's first readers over the Church Fathers and the Platonic commentators to Byzantine and Renaissance thinkers, the papers collected here introduce the reader to the first two millennia of the dialogue's reception history. Thirteen contributions by both junior and established scholars study the engagement with the *Phaedrus* by such major figures as Aristotle, Galen, Origen, Clemens of Alexandria, Plotinus, Augustine, Proclus, Psellus, Ficino, Erasmus and many others. Together they cover the wide range of topics discussed in the dialogue: the value of myth and allegory, religion and theology, love and beauty, the soul and its immortality, teaching and learning, metaphysics and epistemology, rhetoric and dialectic as well as the role and the limits of writing. By placing the dialogue in this broad perspective, the volume will appeal to readers interested in the *Phaedrus* itself as well as to classicists, literary theorists and historians of philosophy, science and religion concerned with the dialogue's reception history and its main protagonists.

Return Statements Gregg Lambert, 2016-08-30 Gregg Lambert examines two facets of the return to religion in the 21st century: the resurgence of overtly religious themes in contemporary philosophy and the global post-secular turn that has been taking place since 9/11. He asks how these two returns to religion can be taking place simultaneously and explores the relationship between them. Lambert reflects on statements of these returns from contemporary philosophers including Alain Badiou, John D. Caputo, Jacques Derrida and Jean-Luc Nancy. He discovers a unique and forboding sense of the term religion that belongs exclusively

PENG,2021-08-04 Truthfully and accurately this book attempts to elucidate the nature and forms of China's ancient wisdom and reinterpret its ideological significance thereby activating its inherent vitality and promoting the construction of contemporary Chinese thought. The wisdom of China with its own discourse system gives unique stipulations to existence, thought, and language. Confucianism, Taoism, and Chan Buddhism as the historical manifestations of Chinese wisdom respectively express the thoughts between man and man, between man and nature, and between man and mind. In fact, these three aspects exactly constitute the whole of man's life world. The thoughts of Confucianism, Taoism, and Chan Buddhism are mainly and respectively represented in *The Four Books* and *Five Classics*, Lao Zi and Zhuang Zi, and Tan Jing. The Sutra of Hui Neng. The wisdom of China, different from the non-natural wisdom of the West, is fundamentally a natural wisdom according to which nature is the basis of human existence, thought, and language. However, in early modern times, the natural history of China was confronted with an unprecedented crisis. Ever since then, China has entered the post-natural era. The coexistence of Heaven and man as the new wisdom of China can be created in the age of globalization through preserving the living elements and eliminating the dead parts in the traditional Chinese wisdom. *Hayabusa2 Asteroid Sample Return Mission* Masatoshi Hirabayashi, Yuichi Tsuda, 2022-04-14 *Hayabusa2 Asteroid Sample Return Mission* Technological Innovation and Advances covers the second Japanese asteroid sample return mission. Returning Home to Our Bodies Abigail Rose Clarke, 2024-01-09 For readers of adrienne maree brown, Staci K Haines, and Robin Wall Kimmerer. A body-based healing model that interrogates what we've been wrongly taught about hierarchies of nature and the body and pushes back against the white supremacy, colonialism, patriarchy, and capitalism embedded in modern embodiment practices. Pushing back against a consumerist, pleasure-centric somatics industry that privileges product over process, Abigail Rose Clarke reminds us that truly meaningful embodiment practice nurtures our relationships among self, nature, and community. Combining the rigor of the scientific method with the poetry and lyricism of movement and somatic studies, Clarke's somatic learning system, *The Embodied Life Method*, centers the body as a guide through today's most seemingly intractable social and environmental challenges, reclaiming the body as a source of liberatory comfort in

times of great uncertainty and yet possibility With tools and practices to help us better understand and dismantle the many ways our bodies are weaponized to serve domination systems topics covered include Harnessing the vitality of curiosity and experimentation Using nature as a guide to possibility Embracing the necessity of difference Exposing the lie of universal isolation Dismantling the fallacy of hierarchy Uncovering the truth of endless capacity Awe as a driving force for transformation With methods honed over decades of inquiry teaching and practice *Returning Home to Our Bodies* provides a lucid body based model of healing and restoration one that imagines a world beyond systems of domination marginalization and isolation to nurture embodied whole community liberation
