Affect Intolerance in

Patient and Analyst Stanley J. Coen,2002 The ability of psychotherapists to tolerate their own feelings in the clinical situation determines how their patients experience and tolerate their own intense and often distressing affect Dr Stanley J Coen draws on his own struggles with the most difficult and challenging patients in his practice and finds that affect

intolerance in both patient and therapist can be mitigated and understood when therapists broaden their emotional range enabling them to engage in emotionally richer interactions with the patient. The more of their own feelings and wishes that clinicians can take responsibility for the more they can tolerate contain and eventually interpret what patients find emotionally unbearable. Dr Coen describes in detail how he works with difficult patients trying to engage them as deeply and fully as both they and he can tolerate. Coen focuses on the pragmatic use of affect tolerance in the clinical situation. Real change through treatment requires mobilization of intense feeling including hate and love. Therapists too must contend with their own emotional inhibitions and stalemates and he suggests collaborative ways to help them. He encourages therapists to broaden their perspectives, consult with colleagues, listen to others, write about their difficulties, work in peer supervision and perhaps even go back to treatment themselves. He counsels them to study one another's difficult cases in a spirit of collegiality to learn what is most effective for patients. Coen shares his own experiences in troublesome clinical situations to help other therapists identify similar difficulties. He shows how all therapists can be prepared to catch their own vulnerabilities and discomforts with their patients' passions and how they can then subject their feelings to self-scrutiny. By seeking to understand and confront their struggles with the feelings that their patients arouse, therapists can more fully help their patients work out their conflicts and to expand their emotional depth.

Art Therapy and Childbearing Issues Nora Swan-Foster, 2020-09-22 This text introduces readers to the diverse and unique ways art therapy is used with women who are undergoing various stages of the childbearing process including conception, pregnancy, miscarriage, childbirth and postpartum. Art Therapy and Childbearing Issues discusses a range of topics including the role of transference, countertransference, attachment and maternal tasks and neuropsychology. The book also addresses several motifs that are outside cultural norms of pregnancy and childbearing such as racial, sociopolitical issues, grief and loss, palliative care, midwifery, menstruation, sex trafficking, disadvantaged populations and incarceration. Each chapter offers research, modalities, case studies and suggestions on how to work in this field in a new way, accompanied by visual representations of different therapy methods and practices. The approachable style will appeal to a range of readers who will come away with a new awareness of art therapy and a greater knowledge of how to work with women as they enter and exit this universal psychobiological experience.

Hungers and Compulsions Jean Petrucelli, Catherine Stuart, 2011-12-29 This book will help therapists understand and treat patients suffering from mild to dangerous forms of eating disorders as well as other compulsions and addictions such as alcoholism and erotic attachments. The chapters help therapists think creatively about these types of patients and to see the effects of treatment. The problems that arise in therapy are explored in essays about dissociation, self-regulation, self-destructive behavior, enactment and other clinical issues.

Psychoanalytic Collisions Joyce Anne Slochower, 2013-05-13 In this beautiful work of reflection and self-reflection, Joyce Slochower wrestles with a seldom-acknowledged dimension of being a psychoanalyst: the dialectic between illusions and less ideal realities that

complicate the analyst's sense of who she is and of how best to meet her clinical obligations. *Psychoanalytic Collisions* details the various ways in which the analyst's wishes both professional and personal collide with the less than perfect actualities of everyday clinical work. The collisions in question are often rooted in the analyst's own illusions: illusions of therapeutic possibility in the face of ordinary human existence or illusions of therapeutic selflessness in the face of one's own immutably self-centered humanity. Such collisions may complicate nonclinical professional activities such as writing in which the analyst's desire to develop a personal idiom collides with self-doubt and the imagined rebuff of teachers and colleagues. Other collisions coalesce dyadically in the consulting room. They may reflect sharp dissonance between what the patient needs the analyst to feel and what the latter actually feels as in discrepant experiences of erotic desire. They may grow out of colliding idealizations of analyst and patient each of the other. And they may arise in the wake of traumatizing life events that destroy the shared illusions on which treatment has rested. In finely wrought examinations of these eventualities, Slochower is guided by the belief that collisions are intrinsic both to forging an analytic identity and to practicing in a manner consonant with that identity. Psychoanalytic collisions she enjoins often cannot be resolved but they can usually be productively engaged. And the very act of engagement be it establishing new grounds for collaboration in the wake of real-world catastrophe or wrestling with clinical impasse grounded in the radically divergent expectations of analyst and patient or owning up to what Slochower terms secret delinquencies can provide the basis for a vision of the good enough analyst in which therapeutic hopefulness coexists with acceptance of the analyst's all-too-human fallibility.

Traumatic Ruptures: Abandonment and Betrayal in the Analytic Relationship Robin A. Deutsch, 2014-05-09

For much of its history, psychoanalysis has been strangely silent about sudden ruptures in the analytic relationship and their immediate and far-reaching effects for those involved. Such issues of betrayal and abandonment, the death of an analyst, a patient's suicide, an ethical violation, disrupt the stability and cohesion of the analytic framework and leave indelible marks on both individuals and institutions alike. In *Traumatic Ruptures*, an international range of contributors present first-person, highly personal and sometimes painful accounts of their experiences and the occasionally difficult yet redeeming lessons they have taken from them. Presented in four parts, the book explores multiple meanings and consequences of the break in the analytic relationship. Part One, *Ruptured Subjectivity: Lost and Found*, presents accounts of clinical encounters with death. Part Two, *Rupture: The Clinical Process*, addresses the sudden loss of an analyst, the trauma of patient suicide, and the issue of countertransference when working with patients who have suffered the unexpected loss of their first analyst. Part Three, *The Long Shadow of Rupture*, examines the effects of ethical violations in the short and long term. Finally, Part Four, *Ruptures: Impact on Organizations*, looks at the wider impact of ethical and sexual boundary violations in the context of an organization and the effect of trauma on a psychoanalytic institute. By giving voice to issues that are usually silenced, the authors here open the door to understanding the complex nature of traumatic rupture within the analytic field. This intimate exploration of psychoanalytic treatments and communities is ideal for psychoanalysts.

Invasive Objects Paul Williams, 2014-04-08 The Director controls Ms B's life He flatters her beguiles her derides her His instructions pervade each aspect of her life including her analytic sessions during which he suggests promiscuous and dangerous things for Ms B to say and do when he suspects that her isolated state is being changed by the therapy The Director is a diabolical foreign body installed in the mind who purports to protect but who keeps Ms B feeling profoundly ill and alone The story of Ms B's analysis is one of many vivid illustrations presented in this collection of papers by Paul Williams who shares his lifetime of experience working with severely disturbed patients As the title suggests the unifying thread of these papers is the investigation of serious mental disturbance often characterized by the presence of intrusive and invasive thoughts and fantasies that originate in a traumatic past but which can colonize and destroy the rational mind The diverse papers are grouped into two related sections Part one is comprised of papers with a clinical orientation including a summary of the analysis of Ms B as well as a speculative paper on the psychosis and recovery of John Nash In part two applied psychoanalytic thinking is integrated with Williams' other professional passion anthropology in a paper that exemplifies generative thought through art poetry and tribal masks Other papers in this section include a short essay that takes Freud bashers to task a reappraisal of the Rat Man and a lively discussion of André Green's central phobic position in borderline thinking Whether engaging in the coconstructed therapeutic relationship or the implications for madness in society at large Williams' diverse influences psychoanalytic and otherwise repeatedly come to the fore in an intellectually stimulating and clinically enriching way It goes without saying that work with patients whose thinking is psychotic is a challenge as these papers clearly demonstrate but Williams reminds us that it is a challenge that psychoanalysis can not only engage but also treat with enduring and impressive therapeutic results **Making Our Ideas Clear** Philip

Rosenbaum, 2015-01-01 This book brings pragmatic theory and praxis into dialogue with contemporary psychodynamic ideas practitioners and clinical issues Generally considered as a historical footnote to psychoanalysis the chapters in this volume demonstrate pragmatism's continued relevance for contemporary thought Not only does pragmatism share many of the values and sensibilities of contemporary psychodynamics its rich philosophical and theoretical emphasis on active meaning making and agentic being in the world complements and extends current thinking about the social nature of self and mind how we occupy space in the world non linear development and processes of communication **Contemporary**

Psychoanalysis and Modern Jewish Philosophy Michael Oppenheim, 2016-10-04 Relational psychoanalysis and modern Jewish philosophy have much to say about the dynamics of human relationships but there has been no detailed thorough and constructive examination that brings together these two incisive discourses *Contemporary Psychoanalysis and Modern Jewish Philosophy Two Languages of Love* explores the critical similarities and differences between the two disciplines

casting new light on both the analytic and philosophical understandings of how relationships develop flourish and fail For psychoanalysts such as Hans Loewald Stephen Mitchell and Jessica Benjamin love is seen as a fundamental life force a key to human motivation and the transformative core of Freud's therapeutic talking cure The Jewish philosophers Franz Rosenzweig Martin Buber and Emmanuel Levinas envision love as having both a human and divine dimension expressed through the dual commandments to love God and the neighbor The two languages are brought to life through chapters that investigate the relationship between self love and love of the other the dynamics of intersubjectivity the methods and possibilities of human transformation the magical powers of language the goal of achieving a meaningful life the significance of responsibility for others and the challenge that death poses to life's fullness This multidisciplinary study drawing on psychology philosophy religion and feminism provides an important contribution to contemporary scientific and humanistic interest in the social and relational dimensions of human living The book will appeal especially to clinicians theorists and scholars of psychoanalysis philosophy of religion and Jewish studies as well as advanced students studying in these fields **Beyond Postmodernism**

Roger Frie, Donna Orange, 2013-12-16 Beyond Postmodernism identifies ways in which psychoanalysis has moved beyond the postmodern debate and discusses how this can be applied to contemporary practice Roger Frie and Donna Orange bring together many of the leading authorities on psychoanalytic theory and practice to provide a broad scope of psychoanalytic viewpoints and perspectives on the growing interdisciplinary discourse between psychoanalysis continental philosophy social theory and philosophy of mind Divided into two parts Psychoanalytic Encounters with Postmodernism and Psychoanalysis Beyond Postmodernism this book elaborates and clarifies aspects of the postmodern turn in psychoanalysis furthers an interdisciplinary perspective on clinical theory and practice contributes to new understandings of theory and practice beyond postmodernism Beyond Postmodernism New Dimensions in Clinical Theory and Practice provides a fresh perspective on the relationship between psychoanalysis and postmodernism and raises new issues for the future It will be of interest to practicing psychoanalysts and psychologists as well as students interested in psychoanalysis postmodernism and philosophy

Zen and Psychotherapy Joseph Bobrow, 2020-06-16 A new take on the interplay of emotional and spiritual development Please read this book Joseph Bobrow is a true meditation teacher who walks his talk and enjoys his practice Thich Nhat Hanh This book is an intimate dialogue that examines the interplay of emotional and spiritual development through the lens of Zen Buddhism and psychotherapy Zen and Psychotherapy artfully illuminates the intrinsic connections between the two practices and demonstrates how the traditions can be complementary in helping to live a truly fulfilled and contented life Zen teacher and psychologist Joseph Bobrow deftly shows how the major themes of trauma attachment emotional communication and emotional regulation play out in the context of Zen and of psychotherapeutic practice and how in concert both provide a comprehensive interactive model of fully functioning human life **Psychoanalytic Perspectives on Conflict** Christopher Christian, Morris N. Eagle, David L Wolitzky, 2017-02-03 Since its inception and throughout its history psychoanalysis has

been defined as a psychology of conflict Freud's tripartite structure of id ego and superego and then modern conflict theory placed conflict at the center of mental life and its understanding at the heart of therapeutic action As psychoanalysis has developed into the various schools of thought the understanding of the importance of mental conflict has broadened and changed In *Psychoanalytic Perspectives on Conflict* a highly distinguished group of authors outline the main contemporary theoretical understandings of the role of conflict in psychoanalysis and what this can teach us for everyday psychoanalytic practice The book fills a gap in psychoanalytic thinking as to the essence of conflict and therapeutic action at a time when many theorists are re conceptualizing conflict in relation to aspects of mental life as an essential component across theories *Psychoanalytic Perspectives on Conflict* will be of interest to psychologists psychoanalysts social workers and other students and professionals involved in the study and practice of psychoanalysis psychotherapy cognitive science and neuroscience

Creative Repetition and Intersubjectivity Bruce E. Reis, 2019-11-12 *Creative Repetition and Intersubjectivity* looks at contemporary Freudian and post Freudian theory through an intersubjective lens Bruce Reis offers views on how psychoanalytic conceptions from the last century uniquely manifest in the consulting rooms of this century how analytic technique has radically evolved through developing Freud's original insights into dreaming and hallucinosis and how the presentation of today's analysands calls for analyst's use of themselves in unprecedented new ways Taking up bedrock analytic concepts such as the death instinct repetition trauma and the place of speech and of silence Reis brings a diversely inspired twenty first century analytic sensibility to his reworking of these concepts and illustrates them clinically in a process oriented approach Here the unconscious intersubjective relation takes on transformative power resulting in the analyst's experience of hybridized chimerical monsters creative seizures reveries and intuitions that inform clinical realities outside of verbal or conscious discourse where change occurs in analysis Drawing on an unusually broad selection of major international influences *Creative Repetition and Intersubjectivity* will be of great interest to psychoanalysts and psychoanalytic psychotherapists across the schools of thought
