and strategy maintaining organizational coherence and unity while others fell short and suffered major splits and schisms. The robust theoretical findings update existing literature on Islamism and advance the state of the field.

Social Conflict and Educational Change in England and France 1789-1848 Michalina Vaughan, Margaret Scotford Archer, 2010-06-24

This book analyses the processes of educational change in England and France by relating political, social, economic and ideological trends to the changing pattern of educational institutions from the time of the Industrial and French revolutions. The authors first assess the relevance of major sociological theories for the interpretation of the main trends in education in both countries in the first half of the nineteenth century. They then put forward an alternative approach derived from Weber which links educational change with social conflict. This theory of domination and assertion of groups competing for control over formal instruction before the emergence of the state system is applied to England and France in this period. The main part of the book is devoted to a more detailed analysis of the competing groups in both countries and of their ideologies which served as blueprints for educational reform.

Civil-Military Relations in Post-Conflict Societies Orlando J. Pérez, 2015-04-10

Guatemala, El Salvador, Nicaragua and Honduras are four Spanish speaking countries in Central America that possess uniformed military institutions. These four countries represent different approaches to reforms of civil-military relations and embody varying degrees of success in both institutional democratization and the managing of security forces. In this book Orlando J. Pérez expertly examines the competing theories of civil-military relations in Central America to advance our understanding of the origins, consequences and persistence of militarism in Latin America. Divided into four parts, Pérez begins by proposing a theoretical framework for analyzing civil-military relations, including an analysis of how U.S. foreign and military policy affects the establishment of stable civilian supremacy over the armed forces. Part Two examines the institutional and legal structures under which civil-military relations are carried out, revealing in Part Three the reorientation of the missions and roles performed by the armed forces in each country. The concluding part analyzes the role, beliefs of members of the military and public opinion about the armed forces in relation to other institutions. Combining both qualitative and quantitative data, Pérez bridges the gap between structural and cultural analyses for a more comprehensive
