**Chile 1970-73: Economic Development and its International Setting** Sandro Antonio Rosario Sideri,2013-03-09 One of the main objectives of the Unidad Popular Popular Unity Govern ment was to attain Chile s evolution towards more advanced forms of social organization within the framework of strictly respected democracy This objective which is deeply

inherent in every human being and consequently present under all conditions and in all parts of the world is not weakened by temporary defeats or transient retreats History proves this and current events in many parts of the world fully confirm it One of the areas in which this struggle for progress takes place most intensively is economics Here clashes take place between the forces which work towards social progress and those which oppose it and aim to maintain a system of intolerable privileges The ideological and material resources available to the forces which attempt to restrain social progress are not small and under given circumstances they overcome the forces by which the majority tries to realize a better future This is expressed very clearly in the relationships which link the internal dynamics of social development with the great economic and political forces operating at the international level Consequently analysis of the social transformation process in such countries as Chile in the context of the political and economic reactions these processes unleash at the international level is of key importance
