based marketplace IBMP on which buyers and sellers can perform service product information and money transactions Due to the early stage of technology adoption the suitability of specific IBMP transactions is often unclear and all those actors involved have to make strategic decisions concerning the way in which future product transactions will be performed With the help of this thesis buyers sellers and marketplace providers can evaluate the transactional suitability of product categories Such an evaluation is of particular importance to small and medium sized enterprises SME They often lack automation and economies of scale Therefore the potential of improved efficiency through Internet technologies is here especially high An exploratory study with the IBMP mundus has allowed for an empirical testing of selected evaluation criteria within selected product categories The final results of the application explain the complexity of the decision situation and the remaining uncertainty due to the early stage of technology adoption

Work in America Carl E. Van Horn, Herbert A. Schaffner, 2003-12-15 The first comprehensive analysis of work and the workforce in the United States from the Industrial Revolution to the era of globalization. This comprehensive two-volume reference book is the first to analyze the central role of work and the workforce in U.S. life from the Industrial Revolution through today's information economy. Drawing on a variety of disciplines—economics, public policy, law, human and civil rights, cultural studies, and organizational psychology—its 256 entries examine key events, concepts, institutions, and individuals in labor history. Entries also tackle tough contemporary questions that reflect the conflicts inherent in capitalism: What is the impact of work on families and communities? On minority and immigrant populations? How shall we respond to changing work roles and the growing influence of the transnational corporation? *Work in America* describes and evaluates attempts to address social and class issues, affirmative action, occupational health and safety, corporate management science, and trade unionism and organized labor, and offers the kind of comprehensive understanding needed to discover workable solutions.

[Law and Medicine in Revolutionary America](#) Linda Myrsiades, 2012-05-18 *Law and Medicine in Revolutionary America: Dissecting the Rush v. Cobbett Trial, 1799* offers the first deep analysis of the most important libel trial in post-revolutionary America and an approach to understanding a much-studied revolutionary figure, Benjamin Rush, in a new light as a legal subject. This libel trial faced off the new nation's most prestigious physician-patriot, Benjamin Rush, against its most popular journalist, William Cobbett, the editor of *Porcupine's Gazette*. Studied by means of a rare and substantial surviving transcript, the trial features six litigating counsel whose narrative of events and roles provides a unique view of how the revolutionary generation saw itself and the legacy it wished to leave to its progeny. The trial is structured by assaults against medical bleeding and its premier practitioner in yellow fever epidemics of the 1790s in Philadelphia, on the one hand, and castigates the licentiousness of the press in the nation's then capital city on the other. As it does so, it exemplifies the much-derided litigiousness of the new nation and the threat of sedition that characterized the development of political parties and the partisan press in late eighteenth-century America.
