Modernity and the Construction of Sacred Space Aaron French, Katharina Waldner, 2024-07-01 This volume focuses on the connection between modern design and architectural practices and the construction of sacred spaces

Not only language and ritual but space place and architecture play a significant role in constructing special or religious spaces. However, this concept of a constructed sacred space remains undertheorized in religious studies and the history of art and architecture in general. This volume therefore revisits the question of a modern sacred space from an interdisciplinary perspective focusing on religion, space, and architecture during the emergence of the modern period and up until contemporary times. Revisiting the ways in which modern architects and artists have endeavored to create sacred spaces and buildings for the modern world will address the underlying questions of how religious ideas, especially those related to esotericism and to alternative religiosities, have transformed the way sacred spaces are conceptualized today.
