Current Trends in Philosophy of Science Wenceslao J. Gonzalez,2022-07-25 This book seeks to provide new perspectives to broaden the field of philosophy of science or to renew themes that have had a great impact on the profession Thus after an initial chapter to situate the current trends in philosophy of science and the prospective of the near future it offers contributions in five thematic blocks I Philosophy of Medicine and Climate Change II Philosophy of Artificial Intelligence and the Internet III New Analyses of Probability and the Use of Mathematics in Practice IV Scientific Progress Revisited and V Scientific Realism and the Instrumentalist Alternative Within this framework the volume addresses such relevant issues as the methodological validity of medical evidence or decision making in situations of uncertainty recent advances in Artificial Intelligence and the future of the Internet current forms of empirically based methodological pluralism and new ways of understanding mathematics with scientific practice and the revision of the approaches to scientific progress based on the experiences accumulated in recent decades **Exercise Prescription** David P. Swain,Brian C. Leutholtz,2007 A case study approach to exercise prescription presenting the information needed to prepare for certification by the ACSM Topics covered include the adoption of VO2 reserve as the basis for writing exercise prescriptions and prescribing exercise to special cases such as pregnant women *The Uncertain Sciences* Bruce Mazlish,2017-07-28 This sweeping inquiry into the present condition of the human sciences addresses the central questions What sort of knowledge do the human sciences claim to be offering To what extent can that knowledge be called scientific and What do we mean by scientific in such a context In this wide ranging book one of the most esteemed cultural historians of our time turns his attention to major questions about human experience and various attempts to understand it scientifically Mazlish considers the achievements failings and possibilities of the human sciences a domain that he broadly defines to include the social sciences literature

psychology and hermeneutic studies In a rich and original synthesis built upon the work of earlier philosophers and historians Mazlish constructs a new view of the nature and meaning of the human sciences Starting with the remote human past and moving through the Age of Discovery to the present day Mazlish discusses the sort of knowledge the human sciences claim to offer He looks closely at the positivistic aspirations of the human sciences which are modeled after the natural sciences and at their interpretive tendencies In an analysis of scientific method and scientific community he explores the roles they can or should assume in the human sciences His approach is genuinely interdisciplinary drawing upon an array of topics from civil society to globalization to the interactions of humans and machines
