SCT? in Action Susan Gantt, 2005-04 Susan P Gantt Ph D CGP ABPP is the Director of the Systems Centered Training and Research Institute a psychologist in private practice in Atlanta and a faculty member in the Emory University School of Medicine Yvonne Agazarian Ed D FAGPA CGP developed a theory of living human systems and its systems centered practice and founded the Systems Centered Training and Research Institute She received the Group Psychologist of the year award from the American Psychological Association in 1997 As this book amply demonstrates SCT has turned out to have powerful organizational applications With its theory of living human systems rather than a separate theory of organizations or of organizational behavior it uses concepts that easily map onto organizational life It looks at systems as a whole but also in parts It stresses the importance of understanding boundaries and contexts It continually focuses on task and perhaps most important of all it offers a sophisticated understanding of roles which includes work roles in organizations It well may be as more consultants working in organizations become more familiar with the concepts and methods SCT offers the SCT approach will come to seem indispensable to the resolution of conflict Ken Eisold Ph D Yvonne Agazarian has long been established as one of the major theoreticians within group and organizational psychology In this book she and Susan Gantt have gathered together enriching and stimulating papers within the SCT tradition with the aim of showing us how it works in practice They have certainly succeeded SCT is about creating a new culture in which both people and the aims of the organization are strengthened and supported For those working with organizations either as leaders or consultants this book will prove to be a stimulating and reliable companion Christer Sandahl Department of Learning Informatics Management and Ethics LIME Karolinska Institute Stockholm

Sct in Action Susan P Gantt, 2005-04-04 The systems centered approach to organizations brings an innovative technology that makes it possible for organizations and work groups to lower the personalizing that is so troublesome for the people in organizations Instead learning to think systems shifts towards being able to see oneself in one's role and context This book illustrates actual examples of the basic systems centered methods being applied in organizational work groups in coaching and in school and educational settings The systems centered approach introduces both a new perspective and an inventive technology Functional subgrouping is used to resolve conflicts and strengthen decision making The systems centered framework of role goal and context enhances teamwork and lowers personalizing Deliberately filtering noisy talk increases the potential for communication to work The paradigm of phases of system development in organizations links each phase to specific change strategies This collection of articles brings together a range of examples that illustrate these human technologies and apply systems centered theory and methods to various organizational contexts companies non profit organizations and educational systems This book is essential reading for consultants managers teachers administrators and any change agents interested in learning to influence the system and not just the people
