The Search for Government Efficiency George W. Downs, Patrick D. Larkey, 1986-01 Measuring E-government Efficiency Manuel Pedro Rodríguez-Bolívar, 2014-03-19 E government has the potential to improve public services information transparency and the engagement of civic participation of the public sector management This book analyzes the achievement of expectations created by public managers policy makers and stakeholders with regard to the implementation of e government policies and applications It also tries to determine whether e government applications have been introduced as a fad or according to real demands from citizenry and if efforts within e government have been effective This book investigates how public managers and policy makers imagine e government policies and the impact of those policies on their management and decision making process through the engagement of citizenry It is also discusses whether e government policies are merely procedural improvements that strictly introduce new ways of delivering public services or disclosing public sector information The book s analysis of the overall expectations on e government applications makes it of interest to scholars in public administration as well as to policy makers and stakeholders **The Search for Government Efficiency** George W. Downs, Patrick D. Larkey, 1986 *Public Service Efficiency* Rhys Andrews, Tom Entwistle, 2014-01-03 The current economic and political climate places ever greater pressure on public organizations to deliver services in a cost efficient way Focused on the costs of service delivery governments across the world have introduced a series of business like practices from performance management to public private partnership in the belief that these will increase the efficiency of their public services However both the debate about public service efficiency and the policies and practices introduced to advance it have developed without a coherent account of what efficiency means in this context and how it should be realized The predominance of a rather narrow definition of the term very often focused on the ratio of inputs to outputs has tended to polarise opinion either for or against efficiency agenda Yet public service efficiency more broadly conceived is an inescapable fact of the public manager s task environment indeed in the past the notion of efficiency was central to the emergence of the field of public administration This book will recover public service efficiency from the relatively narrow terms of recent debates by examining theories and evidence relating to technical allocative distributive and dynamic efficiencies In exploring the relationship between efficiency and democracy this book will move current debates in public administration forward by reflecting on the trade offs between the different dimensions of efficiency that public organizations confront **China's Search for Energy Security** Suisheng Zhao, 2014-06-11 China s rapid economic growth in the recent decades has produced an unprecedented energy vulnerability that could threaten the sustainability of its economic development a linchpin to social stability and ultimately the regime legitimacy of the Chinese Communist Party CCP as well as the foundation for China s rising power aspirations What is the Chinese perception of the energy security and challenges how has the Chinese government responded to the challenges What are the international implications of China s search for energy security This

collection of contributions by leading scholars seeks answers to these extremely important questions The book is divided into three parts Part I presents an overview of China's sense of energy security and its strategic responses Part II examines China's energy policy making processes the efforts to reform and reorganize the energy sector and reset policy priorities Part III focuses on the international implications of China's search for energy security This book consists of articles published in the *Journal of Contemporary China*

government agencies can accomplish when they have experienced capable leaders adopt best practices tailored for government and appropriately leverage technology to support improved operations Change is hard but through government leaders and employees efforts focused on implementing the right changes agencies can significantly improve their operational performance Under the right conditions magic can and does happen Efficiency and Management Guy Callender,2008-11-19 Designing a more reliable basis on which to evaluate management behaviour this excellent book engages fully with management rhetoric and the frequent confusion surrounding it Energy Efficiency of Buildings in Cities United States. Walker Hanlon,2024-09-10 Why Britain s attempt at small government proved unable to cope with the challenges of the modern world In the nineteenth century as Britain attained a leading economic and political position in Europe British policymakers embarked on a bold experiment with small and limited government By the outbreak of the First World War however this laissez faire philosophy of government had been abandoned and the country had taken its first steps toward becoming a modern welfare state This book tells the story of Britain s laissez faire experiment examining why it was done how it functioned and why it was ultimately rejected in favor of a more interventionist form of governance Blending insights

from modern economic theory with a wealth of historical evidence W Walker Hanlon traces the slow expansion of government intervention across a broad spectrum of government functions in order to understand why and how Britain gave up on laissez faire It was not abandoned because Britain s leaders lost faith in small government as some have suggested nor did it collapse under the growing influence of working class political power Instead Britain s move away from small government was a pragmatic and piecemeal response by policymakers who often deeply believed in laissez faire to the economic forces unleashed by the Industrial Revolution The Budget [a Monthly Magazine to Advocate Economy and Efficiency in the Business of Government] Walter Gray Miller,1922 *A Government Ill Executed* Paul C.
