Seasonality In Human Mortality A Medico Geographical Study:

Seasonality in Human Mortality Masako Momiyama,1977 **Seasonality in Human Mortality** Roland Rau,2006-11-24 Seasonal fluctuations in mortality are a persistent phenomenon across populations In Western countries of the Northern hemisphere mortality is typically larger in winter than in summer which is attributed to the detrimental effects of cold to health This does however not explain why in colder countries the differences between winter and summer mortality are smaller than in countries with warm or moderate climate This book therefore investigates whether sociodemographic and socioeconomic factors play a role as important for seasonal mortality as they do for mortality in general Using modern statistical methods the book shows for example for the United States that the fluctuations between winter and summer mortality are smaller the more years someone has spent in school *Characterization of Information Requirements for Studies of CO2 Effects* Margaret R. White,1986 *Medical Geography* Ishtiaq A. Mayer,2007 Study is confined on Jammu and Kashmir India *Advances In Medical Social Sciences* Julio L. Ruffini,2022-03-10 First Published in 1984 The aim of this annual series is to increase communication between health social scientists and to show how anthropology sociology psychology geography economics and political science all contribute to our understanding of health and illness This first volume of devoted to an overall survey of the field Future volumes will concern themselves with the most recent advances in the various areas of study *Climate Vulnerability, Volume 1* ,2013-06-14 Climate Vulnerability Volume 1 **Rising Life Expectancy** James C. Riley,2001-06-04 This book traces the global history of rising life expectancy in the last 200 years *The Cambridge Companion to the Roman Economy* Walter Scheidel,2012-11-08 Thanks to its exceptional size and duration the Roman Empire offers one of the best opportunities to study economic development in the context of an agrarian world empire This volume which is organised thematically provides a sophisticated introduction to and assessment of all aspects of its economic life *An Ecology of High-Altitude Infancy* Andrea S. Wiley,2004-03-22 Andrea Wiley investigates the ecological historical and socio cultural factors that contribute to the peculiar pattern of infant mortality in Ladakh a high altitude region in the western Himalayas of India Ladakhi newborns are extremely small at birth smaller than those in other high altitude populations smaller still than those in sea level regions Factors such as hypoxia dietary patterns the burden of women s work gender infectious diseases seasonality and use of local health resources all affect a newborn s birth weight and raise the likelihood of infant mortality An Ecology of High Altitude Infancy is unique in that it makes use of the methods of human biology but strongly emphasizes the ethnographic context that gives human biological measures their meaning It is an example of a new genre of anthropological work ethnographic human biology **Medical Geography, Third Edition** Melinda S. Meade,Michael Emch,2010-04-20 The leading text in the field this comprehensive book reviews geographic approaches to studying disease and public health issues across the globe It presents cutting edge techniques of spatial and social analysis and explores their relevance for understanding cultural and political ecology disease systems and health

promotion Essential topics include how new diseases emerge and epidemics develop in particular places the intersecting influences on health of biological processes culture environment and behavior and the changing landscape of health care planning and service delivery The text is richly illustrated with tables figures and maps including 16 color plates

Routledge Library Editions: Social & Cultural Geography Various Authors, 2022-07-30 Re issuing books originally published between 1969 and 1990 this set of 15 volumes gives a 20 year perspective on the development of the discipline of social geography The books emphasize the increasingly important contribution of geographical theory to the understanding of social change values economic and political organization and ethical imperatives The volumes are authored by well known international geographers and discuss the philosophy and sociology of geography as well as key themes such as the geography of health crime space They also examine the cross over of geography with other disciplines such as literature and history

Climate Vulnerability, 2013-03-15 Climate change has been the subject of thousands of books and magazines scientific journals and newspaper articles daily It s a subject that can be very political and emotional often blurring the lines between fact and fiction The vast majority of research studies projections and recommendations tend to focus on the human influence on climate change and global warming as the result of CO2 emissions often to the exclusion of other threats that include population growth and the stress placed on energy sources due to emerging global affluence *Climate Vulnerability Five Volume Set* seeks to strip away the politics and emotion that surround climate change and will assess the broad range of threats using the bottom up approach including CO2 emissions population growth emerging affluence and many others to our five most critical resources water food ecosystems energy and human health Inclusively determining what these threats are while seeking preventive measures and adaptations is at the heart of this unique reference work *Takes a Bottom Up approach* addressing climate change and the threat to our key resources at the local level first and globally second providing a more accurate and inclusive approach Includes extensive cross referencing which is key to readers as new connections between factors can be discovered Cuts across a number of disciplines and will appeal to Biological Science Earth Environmental Science Ecology and Social Science comprehensively addressing climate change and other threats to our key resources from multiple perspectives

Health and Climate Change Pim Martens, 2014-04-08 Understanding how complex ecological and climatic change can influence human health is the new challenge before us The book confronts these multidimensional risk assessments head on and will catalyse the important interdisciplinary and integrated approach that is the new paradigm now required for environmental and public health research Dr JONATHAN PATZ Johns Hopkins School of Hygiene and Public Health This book provides a sturdy foundation for thinking about how best to tackle a varied spectrum of population health hazards posed by different aspects and combinations of global change processes it also goes that extra mile by estimating the attributable population burdens of disease or mortality that are likely to result from these aspects of global change It is heartening to see the results of this mathematical modeling being presented in policy relevant terms From the

Foreword by TONY McMICHAEL Health and Climate Change is the first major study of the potentially devastating health impacts of the global atmospheric changes which are under way Using the best available data the author presents models of the most plausible future courses of vector borne diseases such as malaria dengue fever and schistosomiasis skin cancer caused by nozone depletion and cardiovascular and respiratory disorders caused by higher temperatures Current epidemiological research methods are not well adapted to analysing complex systems influenced by human intervention or more simple processes calculated to take place within the distant future Health and Climate Change proposes a new paradigm of integrated eco epidemiological models for these areas of study It will be essential reading for those concerned with public health and epidemiology environmental studies climate change and development studies Originally published in 1998
