The Genres of Thomson's The Seasons Sandro Jung, Kwinten Van De Walle, 2018-09-01 Critics since the eighteenth century have puzzled over the form of James Thomson's composite long poem *The Seasons* 1730 1744 1746 its generically hybrid make up and its relationship to established genres both Classical and modern The textual condition of the work is complicated by the fact that it started as a stand alone poem *Winter* 1726 but was subsequently expanded as part of a revision process that lasted almost two decades through the addition of three further seasons poems Transforming from primarily devotional poem to georgic account of the role of man's laboring role in the creation the meaning of *The Seasons* shifted with each addition of new material Each revision introduced diverse subject matter while existing material was reorganized and occasionally moved from one season installment to another *The Genres of Thomson's The Seasons* is the first collection of essays exclusively devoted to the study of the work's formal heterogeneity polyvocality and polygeneric character All contributions examine the different modes descriptive reflective pastoral hymnal amatory epic georgic dramatic discourses political sentimental scientific and kinds that cooperate to make up the different installments and variants of *The Seasons* They probe the multifarious interactions between different genres and modes and how a renewed focus on the form of Thomson's long poem will result in an understanding of the processual character of *The Seasons* as a synthesizing simulacrum of various discourses and theories of composition The volume's essays map the generic anatomy of the poem in its different incarnations They shed light on the poet's conception of the descriptive long poem and his engaging with formal traditions that would have enabled contemporaneous readers to conceive of *The Seasons* as an assimilating and learned work to be read through both the works of the Classics and moderns Contributions revisit models explaining the structural complexity of *The Seasons* proposing others in their stead and consider Thomson as the author of a long poem in relation to other poets both English and in a transnational study Swedish The poem is furthermore contextualized in terms of sexuality and animal studies

Gill, 2007 In this book the first of a series Robin D Gill author of the highly acclaimed *Rise Ye Sea Slugs and Cherry Blossom Epiphany* the largest single theme anthologies of poetry ever published explores the traditional Japanese New Year through 2 000 translated haiku mostly 17 20c The New Year R H Blyth once wrote is a season by itself That was nowhere so plain as in the world of haiku where *saijiki* large collections called of *ku* illustrating hundreds if not thousands of briefly explained seasonal themes generally comprised five volumes one for each season Yet the great doyen of haiku gave this fifth season considered the first season when it came at the head of the Spring rather than in mid winter only a tenth of the pages he gave to each of the other four seasons 20 vs 200 Was Blyth Zen enthusiast not enamored with ritual Or was he loath to translate the New Year with its many cultural idiosyncrasies most common to the Sinosphere but not to the West because he did not want to have to explain the haiku It is hard to say but with these poems for the re creation of the world Robin D Gill aka *keigu* respect foolishness or respect fool rushes in where even

Anderson, 2003 A folk taxonomy is a semantic field that represents the particular way in which a language imposes structure and order upon the myriad impressions of human experience and perception Thus for example the experience of color in modern English is structured around an inventory of twelve basic color terms but languages vary in the number of basic color terms used from thirteen or fourteen terms to as few as two or three Anthropological linguists have been interested in the comparative study of folk taxonomies across contemporary languages and in their studies they have sometimes proposed evolutionary models for the development and elaboration of these taxonomies The evolutionary models have implications for historical linguistics but there have been very few studies of the historical development of a folk taxonomy within a language or within a language family *Folk Taxonomies in Early English* undertakes this task for English and to some extent for the Germanic and Indo-European language families The semantic fields studied are basic color terms seasons of the year geometric shapes the five senses the folk psychology of mind and soul and basic plant and animal life forms Anderson's emphasis is on folk taxonomies in Old and Middle English and also on the implications of semantic analysis for our reading of early English literary texts *Amherst Graduates' Quarterly*, 1922 **A Season on the Trail** Lynn Setzer, 2013-02-15 A compilation of stories from thru hikers a unique group of people who every year brave a 2 100 mile trail through every type of weather every type of circumstance Gathered from trail registers postcards and personal interviews these voices come alive and evoke the true spirit of the Appalachian Trail
