Secure Internet Programming Security Issues For Mobile And Distributed Objects:

Secure Internet Programming Jan Vitek, Christian D. Jensen, 2007-10-23 Large scale open distributed systems provide an infrastructure for assembling global applications on the basis of software and hardware components originating from multiple sources Open systems rely on publicly available standards to permit heterogeneous components to interact The Internet is the archetype of a large scale open distributed system standards such as HTTP HTML and XML together with the widespread adoption of the Java language are the cornerstones of many distributed systems This book surveys security in large scale open distributed systems by presenting several classic papers and a variety of carefully reviewed contributions giving the results of new research and development Part I provides background requirements and deals with fundamental issues in trust programming and mobile computations in large scale open distributed systems Part II contains descriptions of general concepts and Part III presents papers detailing implementations of security concepts , *Security Modeling and Analysis of Mobile Agent Systems* Lu Ma, Jeffrey J.-P. Tsai, 2006 A mobile agent system could be attacked by malicious agents platforms and third parties Mobile agents simply offer greater opportunities for abuse and misuse which broadens the scale of threats significantly In addition since mobile agents have some unique characteristics such as their mobility security problems have become more complicated in these systems These security problems have become a bottleneck in the development and maintenance of mobile agent systems especially in security sensitive applications such as electronic commerce This book introduces the concept and structure of mobile agent systems and discusses various attacks and countermeasures The emphasis is on the formal modeling and analysis of secure mobile agent systems and their applications Sample Chapter s Chapter 1 Introduction 97 KB Contents Mobile Agent System Attacks and Countermeasures of Software System Security Security Issues in a Mobile Agent System A New Formal Model OCo Extended Elementary Object System EEOS A Formal Framework of a Generic Secure Mobile Agent System Based on EEOS Translating the EEOS Model to Colored Petri Net Model Simulation and Analysis of the Extended Elementary Object System Model of a Secure Mobile Agent System A Case Study in Electronic Commerce A Case Study in E Auction System Readership Computer scientists researchers software engineers programmers and graduate students in software engineering networking and automated systems

Exploring New Frontiers of Theoretical Informatics Jean-Jacques Lévy, Ernst W. Mayr, John C. Mitchell, 2006-04-11 In recent years IT application scenarios have evolved in very innovative ways Highly distributed networks have now become a common platform for large scale distributed programming high bandwidth communications are inexpensive and widespread and most of our work tools are equipped with processors enabling us to perform a multitude of tasks In addition mobile computing referring specifically to wireless devices and more broadly to dynamically configured systems has made it possible to exploit interaction in novel ways To harness the flexibility and power of these rapidly evolving interactive systems there is need of radically new foundational ideas and principles there is need to develop the theoretical foundations required to design these systems and to cope with the many complex issues involved in their construction and there is need to develop effective principles for building and analyzing such systems Reflecting the diverse and wide spectrum of topics and interests within the theoretical computer science community Exploring New Frontiers of Theoretical Informatics is presented in two distinct but interrelated tracks Algorithms Complexity and Models of Computation Logic Semantics Specification and Verification Exploring New Frontiers of Theoretical Informatics contains 46 original and significant contributions addressing these foundational questions as well as 4 papers by outstanding invited speakers These papers were presented at the 3rd IFIP International Conference on Theoretical Computer Science TCS 2004 which was held in conjunction with the 18th World Computer Congress in Toulouse France in August 2004

and sponsored by the International Federation for Information Processing IFIP Formal Methods for Open Object-Based Distributed Systems IV Scott F. Smith, Carolyn L. Talcott, 2012-08-10 Formal Methods for Open Object Based Distributed Systems IV presents the leading edge in the fields of object oriented programming open distributed systems and formal methods for object oriented systems With increased support within industry regarding these areas this book captures the most up to date information on the subject Papers in this volume focus on the following specific technologies components mobile code Java The Unified Modeling Language UML refinement of specifications types and subtyping temporal and probabilistic systems This volume comprises the proceedings of the Fourth International Workshop on Formal Methods for Open Object Based Distributed Systems FMOODS 2000 which was sponsored by the International Federation for Information Processing IFIP and held in Stanford California USA in September 2000
