Security And Politics In South Africa The Regional Dimension:

Security and Politics in South Africa Peter Vale, 2003 In this analysis of South Africa's postapartheid security system Peter Vale moves beyond a realist discussion of interacting states to examine southern Africa as an integrated whole Vale argues that despite South Africa's manipulation of state structures and elites in the region for its own ends the suffering endured under the apartheid regime drew the region together at the popular level and economic factors such as the use of migrant labor reinforced the process of integration Exploring how the region is changing today as transnational solidarity and a single regional economy remove the distinctions between national and international politics he asks whether South African domination can finally be overcome and considers what sort of cosmopolitan political arrangement will be appropriate for southern Africa in the new century

Security and Politics in South Africa Peter C. J. Vale, 2003 Exploring how the region is changing today as transnational solidarity and a single regional economy remove the distinctions between national and international politics he asks whether South African domination can finally be overcome and considers what sort of cosmopolitan political arrangement will be appropriate for southern Africa in the new century BOOK JACKET

Security and Democracy in Southern Africa Gavin Cawthra, André Du Pisani, Abillah H. Omari, 2007 A study of the ambiguity of democratization and how it can generate violence Southern Africa has embarked on one of the world's most ambitious security co-operation initiatives seeking to roll out the principles of the United Nations at regional levels This book examines the triangular relationship between democratization the character of democracy and its deficits and national security practices and perceptions of eleven southern African states Based on national studies conducted by African academics and security practitioners over three years it includes an examination of the way security is conceived and managed as well as a comparative analysis of regional security co-operation in the developing world The study concludes that democratization is ambiguous and uncertain and can in some cases generate violent conflict Building a common security regime in southern Africa will require moving beyond regime solidarity In particular progress will mean building multinational institutions entrenching democratic practices drawing on civil society and integrating the southern African project with that of the African Union The authors conclude with a set of policy recommendations that aim to strengthen both states and civil society within the framework of an emerging common security system

South Africa and the Logic of Regional Cooperation James J. Hentz, 2005 Examines South Africa's role in regional political economy since its transition to democracy

International Society and Its Critics Alex J. Bellamy, 2005 In recent years the English School or international society approach to International Relations has risen to prominence because its theories and concepts seem able to help us explain some of the most complex and seemingly paradoxical features of contemporary world politics In doing so the approach has attracted a variety of criticisms from both ends of the political spectrum Some argue that the claim that states form an international society is premature in an era of terror where power politics and the use of force have returned to the fore

Others insist that international society's state centrism make it an inherently conservative approach unable to address many of the world's most pressing problems. *International Society and its Critics* provides the first in depth study of the English School approach to International Relations from a variety of different theoretical and practical perspectives. Sixteen leading scholars from three continents critically evaluate the School's contribution to the study of international theory and history, consider its relationship with a variety of alternative perspectives including international political economy, feminism, environmentalism and critical security studies, and assess how the approach can help us to make sense of the big issues of the day such as terrorism, the management of cultural difference, global governance, the ethics of coercion and the role of international law. They find that whilst the concept of international society helps to shed light on many of the important tensions in world politics, much work still needs to be done. In particular, the approach needs to broaden its empirical scope to incorporate more of the issues and actors that shape global politics, draw upon other theoretical traditions to improve its explanations of change in world politics, and recognize the complex and multi-layered nature of the contemporary world.

Politics and Pan-Africanism Dawn Nagar, 2019-12-12. Offering an examination of the diplomatic and economic regional power structures in Africa and their relationships with each other, Dawn Nagar discusses the potential and future of pan-Africanism. The three primary regional economic communities (RECs) that are recognised by the African Union as the key building blocks of a united Africa are examined: these are the Common Market for Eastern and Southern Africa (COMESA), the East African Community (EAC) and the Southern African Development Community (SADC). These RECs include Africa's major economies, Egypt, South Africa and Kenya, but are also home to Africa's most conflict-prone and volatile states: the Democratic Republic of the Congo, DRC, Burundi, South Sudan, Somalia and Lesotho. Providing a detailed overview of the current relationship between these power blocs, this book provides insight into the current state of diplomatic and economic relations within Africa and shows how far there is to go for a future of Pan-Africanism.
