Seeing And Visualizing Its Not What You Think:

Seeing and Visualizing Zenon W. Pylyshyn, 2003 How we see and how we visualize why the scientific account differs from our experience

Handbook of Empirical Literary Studies Donald Kuiken, Arthur M. Jacobs, 2021-09-20 This handbook reviews efforts to increase the use of empirical methods in studies of the aesthetic and social effects of literary reading The reviewed research is expansive including extension of familiar theoretical models to novel domains e g educational settings enlarging empirical efforts within under represented research areas e g child development and broadening the range of applicable quantitative and qualitative methods e g computational stylistics phenomenological methods Especially challenging is articulation of the subtle aesthetic and social effects of literary artefacts e g poetry film Increasingly the complexity of these effects is addressed in multi variate studies including confirmatory factor analysis and structural equation modeling While each chapter touches upon the historical background of a specific research topic two chapters address the area s historical background and guiding philosophical assumptions Taken together the material in this volume provides a systematic introduction to the area for early career professionals while challenging active researchers to develop theoretical frameworks and empirical procedures that match the complexity of their research objectives

Kafka's Cognitive Realism Emily Troschianko, 2014-02-03 This book uses insights from the cognitive sciences to illuminate Kafka s poetics exemplifying a paradigm for literary studies in which cognitive scientific insights are brought to bear directly on literary texts The volume shows that the concept of cognitive realism can be a critically productive framework for exploring how textual evocations of cognition correspond to or diverge from cognitive realities and how this may affect real readers In particular it argues that Kafka s evocations of visual perception including narrative perspective and emotion can be understood as fundamentally enactive and that in this sense they are cognitively realistic These cognitively realistic qualities are likely to establish a compellingly direct connection with the reader s imagination but because they contradict folk psychological assumptions about how our minds work they may also leave the reader unsettled This is the first time a fully interdisciplinary research paradigm has been used to explore a single author s fictional works in depth opening up avenues for future research in cognitive literary science

The Sphere of Attention P. Sven Arvidson, 2006-03-12 The phone call came mid afternoon in February of 1996 The program chair for the annual meeting for the Southern Society of Philosophy and Psychology wanted to make sure he had the facts right This is somewhat unusual he began You re a philosophy professor who wants to present to psychologists in the psychology portion of the meeting That s right Well your paper was accepted for that part of the program but the others just wanted me to check and make sure that s where you want to be presenting That s right Reassured the professor wished me luck and said good bye In my session at the meeting I was the last to present As my time approached the medium sized room slowly became crowded I dreamed that these psychologists had left their other meetings early to make sure to catch my presentation on the use of metaphors in attention research As I arose to present I

noticed that the half full room had become standing room only Finally after years of feeling as if I was struggling alone in promoting and defending a phenomenology of attention I had an eager audience for my message My persistence had paid off I delivered my message with passion

Computation, Cognition, and Pylyshyn Don Dedrick, Lana Trick, 2009 Zenon Pylyshyn is a towering figure in cognitive science his book *Computation and Cognition* MIT Press 1984 is a foundational presentation of the relationship between cognition and computation His recent work on vision and its preconceptual mechanism has been influential and controversial In this book leading cognitive scientists address major topics in Pylyshyn's work and discuss his contributions to the cognitive sciences Contributors discuss vision considering such topics as multiple object tracking action molecular and cellular cognition and inhibition of return and foundational issues including connectionism modularity the evolution of the perception of number computation cognitive architecture location and visual sensory representations of objects

Human Attention in Digital Environments Claudia Roda, 2011-02-03 Digital systems such as phones computers and PDAs place continuous demands on our cognitive and perceptual systems They offer information and interaction opportunities well above our processing abilities and often interrupt our activity Appropriate allocation of attention is one of the key factors determining the success of creative activities learning collaboration and many other human pursuits This book presents research related to human attention in digital environments Original contributions by leading researchers cover the conceptual framework of research aimed at modelling and supporting human attentional processes the theoretical and software tools currently available and various application areas The authors explore the idea that attention has a key role to play in the design of future technology and discuss how such technology may continue supporting human activity in environments where multiple devices compete for people's limited cognitive resources

Education at the Intersection of Globalization and Technology Sharon Waller, Lee Waller, Vongai Mpofu, Mercy Kurebwa, 2021-04-07 Today's educators stand at the crossroads of globalization and technology The world is rapidly shrinking The workplace is being transformed before our very eyes Technology is forever changing the way we perceive reality and the way we do business Educators are required to equip students for a workplace that has yet to emerge The skill sets of today's job market are often obsolete before students can enter the workplace Now is the time for educators to rise to the challenges of our modern world By embracing the vision of yesterday's practitioners and joining hands with tomorrow's practitioners educators can transform our world and equip their students for the upward mobility and career flexibility required in tomorrow's workplace

Evaluative Perception Anna Bergqvist, Robert Cowan, 2018-05-31 Evaluation is ubiquitous Indeed it isn't an

exaggeration to say that we assess actions character events and objects as good cruel beautiful etc almost every day of our lives Although evaluative judgement for instance judging that an institution is unjust is usually regarded as the paradigm of evaluation it has been thought by some philosophers that a distinctive and significant kind of evaluation is perceptual For example in aesthetics some have claimed that adequate aesthetic judgement must be grounded in the appreciator's first hand perceptual experience of the item judged In ethics reference to the existence and importance of something like ethical perception is found in a number of traditions for example in virtue ethics and sentimentalism This volume brings together philosophers working in aesthetics epistemology ethics philosophy of mind and value theory to investigate what we call evaluative perception Specifically they engage with 1 Questions regarding the existence and nature of evaluative perception Are there perceptual experiences of values If so what is their nature Are perceptual experiences of values *sui generis* Are values necessary for certain kinds of perceptual experience 2 Questions about epistemology Can evaluative perceptual experiences ever justify evaluative judgements Are perceptual experiences of values necessary for certain kinds of justified evaluative judgements 3 Questions about value theory Is the existence of evaluative perceptual experience supported or undermined by particular views in value theory Are particular views in value theory supported or undermined by the existence of evaluative perceptual experience

The Pleasure of Pictures Jérôme Pelletier,Alberto Voltolini,2018-07-17

The general aim of this volume is to investigate the nature of the relation between pictorial experience and aesthetic appreciation In particular it is concerned with the character and intimacy of this relationship is there a mere causal connection between pictorial experience and aesthetic appreciation or are the two relata constitutively associated with one another The essays in the book's first section investigate important conceptual issues related to the pictorial experience of paintings In Section II the essays discuss the notion of styles techniques agency and facture and also take into account the experience of photographic and cinematic pictures The Pleasure of Pictures goes substantially beyond current debates in the philosophy of depiction to launch a new area of reflection in philosophical aesthetics
