Seeing And Writing Fifteen Exercises In Composing Experience:

Seeing and Writing W. Walker Gibson, 1974 *Contemporary Composition Studies* Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field s development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person s contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1976 **A Teaching Subject** Joseph Harris, 2012-01-01 In this classic text Joseph Harris traces the evolution of college writing instruction since the Dartmouth Seminar of 1966 A Teaching Subject offers a brilliant interpretive history of the first decades during which writing studies came to be imagined as a discipline separable from its partners in English studies Postscripts to each chapter in this new edition bring the history of composition up to the present Reviewing the development of the field through five key ideas Harris unfolds a set of issues and tensions that continue to shape the teaching of writing today Ultimately he builds a case now deeply influential in its own right that composition defines itself through its interest and investment in the literacy work that students and teachers do together Unique among English studies fields composition is Harris contends a teaching subject Justice as Attunement Richard Dawson, 2013-08-09 The meaning of an expression resides not in the expression itself but in the experience of a person s engagement with it Meaning will be different not only to different people but also to the same person at different times This book offers a way of attending to these different meanings This way or method is a version of a trans cultural activity that Richard Dawson calls attunement The activity of attunement involves a movement of self adjustment to a language which a person transforms in her or his use of it Consciously performing the activity can enable understanding of the processes by which we constitute ourselves and others when we use a language This directly connects to the topic justice which is concerned with constituting appropriate selves and relations Justice as Attunement engages with a wide range of

texts legal literary economic philosophical among others and illuminates many useful and fascinating connections between them There is a sense in which this book transcends disciplinary boundaries for in addition to students and scholars of law literature economics and philosophy it is written to a general reader who is interested in reflecting on and doing justice to their experiences in life *A Laboratory Approach to Writing* Carol Feiser Laque,Phyllis A.
