Seeing Things:

Seeing Things Alice McIntyre, 2011-11-08 In an effort to address her obsession with worrying about people ten year old Trina decides to invent an object she calls the Thing Whenever Trina starts becoming overly concerned about someone she opens the top of her magical box peeks inside and hopes that everything she sees will make her feel all right But one night everything is not all right While looking in the Thing Trina sees her older sister involved in a deadly car crash Suddenly Trina is left trying to make sense of events that are difficult for her to understand her sisters death her alcoholic father her overworked mother and her relationship with a God that would let bad things happen to good people The tragedy that befalls her family teaches Trina how to survive disappointment and loss with humor love and a belief in second chances Seeing Things Mason Kamana Allred, 2023-02-14 In this theoretically rich work Mason Kamana Allred unearths the ways Mormons have employed a wide range of technologies to translate events beliefs anxieties and hopes into reproducible experiences that contribute to the growth of their religious systems of meaning Drawing on methods from cultural history media studies and religious studies Allred focuses specifically on technologies of vision that have shaped Mormonism as a culture of seeing These technologies he argues were as essential to the making of Mormonism as the humans who received interpreted and practiced their faith While Mormons uses of television and the internet are recent examples of the tradition s use of visual technology Allred excavates older practices and technologies for negotiating the spirit such as panorama displays and magic lantern shows Fusing media theory with feminist new materialism he employs media archaeology to examine Mormons ways of performing distinctions beholding as a way to engender radical visions and standardizing vision to effect assimilation Allred s analysis reveals Mormonism as always materially mediated and argues that religious history is likewise inherently entangled with media *Seeing Things* Kartik Nair, 2024-02-13 In 1980s India the Ramsay Brothers and other filmmakers produced a wave of horror movies about soul sucking witches knife wielding psychopaths and dark caped vampires *Seeing Things* is about the sudden cuts botched prosthetic effects continuity errors and celluloid damage in these movies Such moments may very well be failures of various kinds but in this book Kartik Nair reads them as clues to the conditions in which the films were once made censored and seen offering a view from below of the world s largest film culture Combining extensive archival research and original interviews with close readings of landmark films including *Purana Mandir Veerana* and *Jaani Dushman* this book tracks the material coordinates of horror cinema s spectral images In the process *Seeing Things* discovers a spectral materiality one that informs Bombay horror s haunted houses grotesque bodies and graphic violence and gives visceral force to our experience of the genre s globally familiar conventions **Seeing Things Differently** Janet Kuypers, 2005 Seeing Things as They Are Duncan B. Reyburn, 2016-08-19 The jovial journalist philosopher and theologian G K Chesterton felt that the world was almost always in permanent danger of being misjudged or even overlooked and so the pursuit of understanding insight and awareness was his perpetual preoccupation Being sensitive

to the boundaries and possibilities of perception he was always encouraging his audience to find a clear view of things His belief was that it really is possible albeit in a limited way to see things as they are This book which marries Chesterton's unique perspective with the discipline of philosophical hermeneutics aims to outline what Chesterton can teach us about reading interpreting and participating in the drama of meaning as it unfolds before us in words and in the world Strictly speaking of course Chesterton is not a hermeneutic philosopher but his vast body of work involves important hermeneutic considerations In fact his unique interpretive approach seems to be the subtext and implicit fascination of all Chesterton scholarship to date and yet this book is the first to comprehensively focus on the issue By taking Chesterton back to his philosophical roots via his marginalia his approach to literary criticism his Platonist Thomist metaphysics and his Catholic theology this book explicitly and compellingly tackles the philosophical assumptions and goals that underpin his unique posture towards reality

Seeing Things at Night Heywood Broun, 2020-07-31 Reproduction of the original *Seeing Things at Night* by Heywood Broun

Seeing Things as They are John R. Searle, 2015 This book provides a comprehensive account of the intentionality of perceptual experience With special emphasis on vision Searle explains how the raw phenomenology of perception sets the content and the conditions of satisfaction of experience The central question concerns the relation between the subjective conscious perceptual field and the objective perceptual field Everything in the objective field is either perceived or can be perceived Nothing in the subjective field is perceived nor can be perceived precisely because the events in the subjective field consist of the perceivings whether veridical or not of the events in the objective field Searle begins by criticizing the classical theories of perception and identifies a single fallacy what he calls the Bad Argument as the source of nearly all of the confusions in the history of the philosophy of perception He next justifies the claim that perceptual experiences have presentational intentionality and shows how this justifies the direct realism of his account In the central theoretical chapters he shows how it is possible that the raw phenomenology must necessarily determine certain form of intentionality Searle introduces in detail the distinction between different levels of perception from the basic level to the higher levels and shows the internal relation between the features of the experience and the states of affairs presented by the experience The account applies not just to language possessing human beings but to infants and conscious animals He also discusses how the account relates to certain traditional puzzles about spectrum inversion color and size constancy and the brain in the vat thought experiments In the final chapters he explains and refutes Disjunctivist theories of perception explains the role of unconscious perception and concludes by discussing traditional problems of perception such as skepticism
