Losing Control Global Security In The Twenty First Century:

Losing Control Paul Rogers,2000 A radical analysis of global security which argues that elite societies cannot maintain their power and position in an increasingly divided and environmentally constrained world

Losing Control Paul Rogers,2010-04-15 When *Losing Control* was first published a decade ago it was years ahead of its time Its argument was simple the real causes of global insecurity were the widening socio economic divide global marginalization and environmental limitations especially climate change and conflict over energy resources Paul Rogers one of the most original thinkers on international security pointed to a world in which irregular warfare from the margins would prevent powerful states from maintaining their position He even predicted accurately how the United States would respond to a catastrophic attack The new edition brings the whole analysis right up to date arguing persuasively that the world s elite cannot maintain control and that a far more emancipatory and sustainable approach to global security has to be developed

change **The Limits of Global Governance** Jim Whitman, 2005 This book provides a thorough overview of global governance exploring the key conceptual issues and illustrating them with international case studies as well as offering a provocative critique of the research in the field **Rethinking World Politics** Philip G. Cerny, 2010-03-24 Rethinking World Politics is a major intervention into a central debate in international relations how has globalization transformed world politics Most work on world politics still presumes the following in domestic affairs individual states function as essentially unified entities and in international affairs stable nation states interact with each other In this scholarship the state lies at the center it is what politics is all about However Philip Cerny contends that recent experience suggests another process at work transnational neopluralism In the old version of pluralist theory the state is less a cohesive and unified entity than a varyingly stable amalgam of competing and cross cutting interest groups that surround and populate it Cerny explains that contemporary world politics is subject to similar pressures from a wide variety of sub and supra national actors many of which are organized transnationally rather than nationally In recent years the ability of transnational governance bodies NGOs and transnational firms to shape world politics has steadily grown Importantly the rapidly growing transnational linkages among groups and the emergence of increasingly influential even powerful cross border interest and value groups is new These processes are not replacing nation states but they are forging new transnational webs of power States he argues are themselves increasingly trapped in these webs After mapping out the dynamics behind contemporary world politics Cerny closes by prognosticating where this might all lead Sweeping in its scope Rethinking World Politics is a landmark work of international relations theory that upends much of our received wisdom about how world politics works and offers us new ways to think about the forces shaping the contemporary world
