The V1 Flying Bomb Campaign 1944-1945 Jan Gore, 2024-11-30 Analyzes the V1 campaign's development and impact detailing its strategic bombing efforts terror tactics and phases of escalation during World War II In this new study Jan Gore assesses the success of the V1 campaign The background to the development of the V1 will be examined from the initial references to a mystery weapon to the gradual realisation by the British that the Germans were planning both a flying bomb V1 and a long range rocket V2 Once the first V1 sites were identified the British began a strategic bombing campaign later joined by the Americans However as the Normandy landings became imminent in June 1944 Hitler realised he had nothing to lose by delaying his vengeance attacks A week after D Day the first V1s began to reach England The attacks swiftly intensified It was a very different campaign from those before The pilotless planes could be produced cheaply and there was no need to put expensively trained pilots at risk The planes could be launched by day or night whatever the weather They were true terror weapons as the first hand accounts of those who lived through the attacks make clear there was very little notice that a doodlebug explosion was imminent and so it was almost impossible to take cover The book describes the first weekend of the attacks with the bombing of the Guards Chapel the evacuation program which followed and the UK's defense strategies It goes on to discuss the second phase of the attacks including the planned bombing of Manchester and the third phase of the campaign where V1s were ground launched from the Netherlands

Bombing Europe Kevin A. Mahoney, 2015-08-14 Get the complete story of one of the most ambitious aerial campaigns in history the bombing of Europe under the Axis powers illustrated with over 200 compelling photos Created in November 1943

the Fifteenth Air Force was the direct descendant of the American Ninth and Twelfth Air Forces that had fought in the Mediterranean since the summer of 1942. Its force included 210 B 17 Flying Fortress and 90 B 24 Liberator bombers escorted by P 38 Lightning, P 47 Thunderbolt and P 51 Mustang fighters. They took the air battle against the Axis to areas Allied bombers based in England could not reach: southern Germany, Austria, eastern Europe and the Balkans. Their reach in the Balkans included the oil refineries at Ploesti, Romania, vital to Germany's war effort. Its crews fought the weather as well as the enemy by flying over the Alps to reach many of their targets and made a significant contribution to the victory over the Axis powers and Nazi Germany. Although enemy fighter planes were a major menace during the first nine months of the Fifteenth's air war, ubiquitous anti-aircraft fire called flak also took a toll on American bombers throughout the campaign. This book tells the story of the brave airmen who bombed the majority of Europe in an effort to win the war.

Writing History 7-11 Hilary Cooper, 2014-06-05

Writing History 7-11 supports students and primary teachers helping them to explore ways in which activities involving the talk that underpins historical enquiry can be developed into reading and exciting extended reflective writing. The step that teachers and pupils take from talk for learning to talk for writing is a vital one. In this book the authors argue that all aspects of historical enquiry leading to writing involve discussion and dialogue which permeate every aspect of doing history. From this perspective they set out a theoretical framework for understanding the role of talk and reading in developing pupils' critical thinking and confident reflective writing then demonstrate through a series of case studies in which teachers, university lecturers and pupils work together how the theory is put into practice in the classroom. Themes include: How to support children in writing in a variety of interesting genres; How to make links between the National Curriculum 2013 for History and for English; How to plan for breadth and depth studies in the new National Curriculum; How activities in History 5-11 can be developed into exciting extended writing. The second half of the book draws upon case studies from a number of real primary classrooms with children of different ages. Each case study shows how teaching was planned to develop children's confidence and enjoyment in discussion and to scaffold reasoned written explanation and argument. Topics presented are all relevant to the new curriculum framework and include talking and reading about Time change and significance over 6000 years; writing a television script; Celtic Britain and the Roman Army; writing a travel brochure about Celtic Britain; The destruction of Roman towns; writing a Saxon poem; An archaeological investigation of a body in a Danish peat bog; writing a newspaper report; Did any countries benefit from WW11; writing an argued viewpoint; The expansion westwards of European settlers; writing a flap book exploring different perspectives. This indispensable book provides not only sources for pupils to use in their writing but also models and exemplars of different styles and voices to draw upon.

The Pentagon has a dirty little secret they've been keeping quiet for forty years. During the Cold War a number of live H bombs were jettisoned and lost around the country as a result of mishaps and mid-air collisions. A disgraced former Pentagon weapons expert, Howie Collyer, who blew the whistle on the
