Giannalberto Bendazzi, 2015-11-06 A continuation of 1994's groundbreaking *Cartoons* Giannalberto Bendazzi's *Animation A World History* is the largest, deepest, most comprehensive text of its kind based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often neglected areas, and introducing over fifty previously undiscovered artists. Full of first-hand, never-before-investigated and elsewhere unavailable information, *Animation A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume III catches you up to speed on the state of animation from 1991 to present. Although characterized by such trends as economic globalization, the expansion of television series, emerging markets in countries like China and India, and the consolidation of elitist auteur animation, the story of contemporary animation is still open to interpretation. With an abundance of first-hand research and topics ranging from Nickelodeon and Pixar to modern Estonian animation, this book is the most complete record of modern animation on the market and is essential reading for all serious students of animation history. Key Features: Over 200 high-quality headshots and film stills to add visual reference to your research. Detailed information on hundreds of never-before-researched animators and films. Coverage of animation from more than 90 countries and every major region of the world. Chronological and geographical organization for quick access to the information you're looking for. **Little Friends** Stephanie

Donald, 2005-04-07 Contributing to the growing debates on children and media worldwide, *Little Friends* explores the pervasive presence of film culture in the lives of children in China. The book also introduces the work of the little-known Children's Film Studio and the Film Course, a reform period attempt by Chinese filmmakers and policy leaders to control the media to which schoolchildren were exposed. Stephanie Donald uses expansive firsthand interviews, children's drawings, and film history to tell a compelling cinematic story before it is forgotten in the onrush of globalized culture. She is especially careful to bring in the interests and experiences of children themselves. The book follows the trajectory of contemporary media analysis in privileging the use as well as the content of media. The author's turn to the end user enriches her discussion of media literacy, cultural competencies, and perhaps especially in the Chinese case, consideration of the desired uses of media in relation to state priorities and social expectations. This is a trend that belongs to an era of digital experimentation and commercial development in interactive television, streamed news, and entertainment, and the multiple unintended uses of Internet and mobile technologies. Notwithstanding the contemporary context, Donald's arguments consider a range of media deployment that, although not especially new in technological terms, offer new insights into a formalized Chinese media system for children. Scholars and students of Asian and children's film and education will find this unique work a fascinating window into Chinese culture and society and a provocative exploration of media culture.
