The Tyranny of the Straight Line Min-Kyung Lee, 2024-04-02 A revolutionary study of nineteenth century Parisian cartography and its role in shaping a modern conception of space Maps are rarely given the same attention as other print media or art forms in urban history Author Min Kyung Lee shows their rich potential in this lavishly illustrated study which brings together maps and other archival materials along with drawings and paintings She works across disciplines to examine mapping practices in the development of nineteenth century Paris and the transformative role that urban mapping had on the city's modernization Lee investigates Paris's formation as a modern city ultimately framing the practice of cartography as a catalyst for the emergence of new spatial and compositional theories Beginning with an examination of the emblematic urban plan that Napoleon III gave to the prefect of the Seine Georges Eugène Haussmann in 1853 Lee explores the significance of the map itself the means of its production through surveying the methods of its use and reception by architects engineers and administrators and its place in the visual culture of Paris's modernization At the heart of this exploration is a focus on orthography in architecture and the new quality of exactitude in modern mapping practices The precise grid structure of orthographic maps and plans evinced a sense of objectivity yet it was not without political context and social consequences as Lee demonstrates throughout
