and Rules Marcelo Neves,2021-04-29 This title offers a unique approach to constitutionalism focusing on the paradoxical relationship between principles and rules from the perspective of systems theory It presents a critical counterpoint to Ronald Dworkin s principle based theory and in particular to Robert Alexy s idea of optimizing balancing Instead of ceding to the compulsion of an optimizing balancing it suggests the possibility of a comparative or at least satisficing balancing

considering the precariousness of legal rationality The book also reverses Dworkin s metaphor associating rules with Hercules and principles with the Hydra It takes constitutional principles seriously criticizing the abuse of principles by the legal and constitutional doctrine and practice and pointing out their relationship of complementarity and tension with rules

Finally it offers an alternative model to the recent legal and constitutional theory on the basis of certain assumptions of the systems theory It deals especially with the paradox of the circular and reflexive relationship between constitutional principles and rules the former refers primarily to the openness and adequacy of legal system to society and thus to substantive argumentation the second refers primarily to the closure and consistency of legal system and thus to formal argumentation
