The Internet Unconscious Sandy Baldwin, 2016-08-25 Winner of the N Katherine Hayles Award for Criticism of Electronic Literature from the Electronic Literature Organization There is electronic literature that consists of works and the authors and communities and practices around such works This is not a book about that electronic literature It is not a book that charts histories or genres of this emerging field not a book setting out methods of reading and understanding *The Internet Unconscious* is a book on the poetics of net writing or more precisely on the subject of writing the net By writing the net Sandy Baldwin proposes three ways of analysis 1 an understanding of the net as a loosely linked collocation of inscriptions of writing practices and materials ranging from fundamental TCP IP protocols to CAPTCHA and Facebook 2 as a discursive field that codifies and organizes these practices and materials into text and into textual practices of reading archiving etc and into an aesthetic institution of electronic literature and 3 as a project engaged by a subject a commitment of the writers body to the work of the net *The Internet Unconscious* describes the poetics of the net s becoming literary by employing concepts that are both technically specific and poetically charged providing a coherent and persuasive theory The incorporation and projection of sites and technical protocols produces an uncanny displacement of the writer s body onto diverse part objects and in turn to an intense and real inhabitation of the net through writing The fundamental poetic situation of net writing is the phenomenology of as if Net writing involves construal of the world through the imaginary

Approaches to Media Literacy: A Handbook Art Silverblatt, Jane Ferry, Barbara Finan, 2015-01-28

Completely updated with current examples and new coverage of digital media this popular handbook provides a range of qualitative approaches that enable students to effectively decipher information conveyed through the channels of mass communication photography film radio television and interactive media It aim is to help students develop critical thinking skills and strategies with regard to what media to use and how to interpret the information that they receive The techniques include ideological autobiographical nonverbal and mythic approaches An Instructor s Manual is available to professors who adopt this new edition *Irigaray* Rachel Jones,2013-05-03 The work of French Philosopher Luce Irigaray has exerted a profound influence on feminist thinking of recent decades and provides a far reaching challenge to western philosophy s entrenched patriarchal norms This book guides the reader through Irigaray s critical and creative transformation of western thought Through detailed analysis of her most important text *Speculum of the Other Woman* Rachel Jones carefully examines Irigaray s transformative readings of such icons of the western tradition as Plato Descartes Kant and Hegel She shows that these readings underpin Irigaray s claim that western philosophy has been dependent on the forgetting of both sexual difference and of our singular beginnings in birth In response Irigaray seeks to recover a positive account of sexual difference which would release woman from her traditional position as the other of the subject and allow her to speak as a subject in her own right In a sensitive reading of Irigaray s work Jones shows why this distinctively feminist project necessarily involves the transformation of the fundamental terms of western metaphysics By foregrounding Irigaray s approach to questions of otherness and alterity she concludes that for Irigaray cultivating an ethics of sexuate difference is the condition of ethical relations in general Lucidly and persuasively written this book will be an invaluable resource for students and scholars seeking to understand Irigaray s original contribution to philosophical and feminist thought

Studies in the Psychology of Sex v4 Havelock Ellis,2015-11-07 umescence the process by which the organism is brought into the physical and psychic state necessary to insure conjugation and detumescence to some extent comes about through the spontaneous action of internal forces To that extent it is analogous to the physical and psychic changes which accompany the gradual filling of the bladder and precede its evacuation But even among animals who are by no means high in the zo logical scale the process is more complicated than this External stimuli act at every stage arousing or heightening the process of tumescence and in normal human beings it may be said that the process is never completed without the aid of such stimuli for even in the auto erotic sphere external stimuli are still active either actually or in imagination The chief stimuli which influence tumescence and thus direct sexual choice come chiefly indeed exclusively through the four senses of touch smell hearing and sight All the phenomena of sexual selection so far as they are based externally act through these four senses 1 The reality of the influence thus exerted may be demonstrated statistically even in civilized man and it has been shown that as regards for instance eye color conjugal partners differ sensibly from the unmarried persons by whom they are surrounded When therefore we are exploring the nature of the influence which stimuli acting through the sensory channels exert on the strength and direction of the sexual impulse we are intimately concerned with the process by which the actual form and color not alone of living things generally but of our own species have been shaped and are still being shaped At the same time it is probable we are exploring the mystery which underlies all the subtle appreciations all the emotional undertones which are woven in the web of the whole world as it appeals to us through those sensory passages by which alone it can reach us We are here approaching therefore a fundamental subject of unsurpassable importance a subject which has not yet been accurately explored save at a few isolated points and one which it is therefore impossible to deal with fully and adequately Yet it cannot be passed over for it enters into the whole psychology of the sexual instinct Studies in the psychology of sex. v.4, 1906 Havelock Ellis,1905 **Studies in the Psychology of Sex** Havelock Ellis,2001 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see

Studies in the Psychology of Sex (Vol. 1-6) Havelock Ellis, 2020-07-14 This edition contains three studies which seem to me to be necessary prolegomena to that analysis of the sexual instinct which must form the chief part of an investigation into the psychology of sex The first sketches the main outlines of a complex emotional state which is of fundamental importance in sexual psychology the second by bringing together evidence from widely different regions suggests a tentative explanation of facts that are still imperfectly known the third attempts to show that even in fields where we assume our knowledge to be adequate a broader view of the phenomena teaches us to suspend judgment and to adopt a more cautious attitude So far as they go these studies are complete in themselves their special use as an introduction to a more comprehensive analysis of sexual phenomena is that they bring before us under varying aspects a characteristic which though often ignored is of the first importance in obtaining a clear understanding of the facts the tendency of the sexual impulse to appear in a spontaneous and to some extent periodic manner affecting women differently from men This is a tendency which later I hope to make still more apparent for it has practical and social as well as psychological implications Here and more especially in the study of those spontaneous solitary manifestations which I call auto erotic I have attempted to clear the ground and to indicate the main lines along which the progress of our knowledge in these fields may best be attained _x000D_ _x000D_ _x000D_ **Studies in the Psychology of Sex**

Havelock Ellis, 2004-10-15 *The Psychology of Sex (Vol. 1-6)* Havelock Ellis, 2020-12-17 This edition contains three studies which seem to me to be necessary prolegomena to that analysis of the sexual instinct which must form the chief part of an investigation into the psychology of sex The first sketches the main outlines of a complex emotional state which is of fundamental importance in sexual psychology the second by bringing together evidence from widely different regions suggests a tentative explanation of facts that are still imperfectly known the third attempts to show that even in fields where we assume our knowledge to be adequate a broader view of the phenomena teaches us to suspend judgment and to adopt a more cautious attitude So far as they go these studies are complete in themselves their special use as an introduction to a more comprehensive analysis of sexual phenomena is that they bring before us under varying aspects a characteristic which though often ignored is of the first importance in obtaining a clear understanding of the facts the tendency of the sexual impulse to appear in a spontaneous and to some extent periodic manner affecting women differently from men This is a
