**Low-Level Radiation and Immune System Damage** Joseph J. Mangano, 2018-01-31 Atomic weapons and nuclear power plants they promised to ensure world peace and provide efficient energy to Americans during the 1940s and 1950s. Meanwhile the post war prosperity led to the most dramatic population explosion ever witnessed in the United States the baby boomer generation. Times and politics may change but many baby boomers as well as their descendants now live with an unforeseen result of the nuclear age. Rates of immune related diseases have risen steadily throughout the past few decades from allergies to cancer. While advances in medical care have kept death rates relatively low the increased prevalence of certain diseases cannot be ignored. **Low Level Radiation and Immune System Damage: An Atomic Era Legacy** establishes an undeniable connection between the nuclear build up of the past and the widespread health problems seen today. While baby boomers were growing up in the 40s and 50s above ground atomic bomb tests and start ups of civilian nuclear power plants were carried out without fear of public exposure to radioactive emissions. Although the consequences of low level radiation are still hotly debated Mangano's research findings emphasize a direct link between nuclear exposure and immune system deficiency. In addition to substantial data on immune disease trends among Americans born between the mid 1940s and mid 1960s Mangano also examines similar issues concerning baby boomer children and grandchildren. Health professionals environmentalists historians and students alike will find much to learn from these pages. As America and the world come to terms with the post Cold War era there are still many lessons to recognize consider and learn from the still recent past. **Low Level Radiation and Immune System Damage: An Atomic Era Legacy** explores a relentless trend that will not soon be over with potential repercussions into the 21st century.

*The Hanford Plaintiffs* Trisha T. Pritikin,2020-02-25 For more than four decades beginning in 1944 the Hanford nuclear weapons facility in southeastern Washington State secretly blanketed much of the Pacific Northwest with low dose ionizing radiation the byproduct of plutonium production For those who lived in the vicinity many of them families of Hanford workers the consequences soon became apparent as rates of illness and death steadily climbed despite repeated assurances from the Atomic Energy Commission that the facility posed no threat Trisha T Pritikin who has battled a lifetime of debilitating illness to become a lawyer and advocate for her fellow downwinders tells the devastating story of those who were harmed in Hanford s wake and seeking answers and justice were subjected to yet more suffering At the center of *The Hanford Plaintiffs* are the oral histories of twenty four people who joined *In re Hanford Nuclear Reservation Litigation* the class action suit that sought recognition of and recompense for the grievous injury knowingly caused by Hanford Radioactive contamination of American communities was not uncommon during the wartime Manhattan Project nor during the Cold War nuclear buildup that followed Pritikin interweaves the stories of people poisoned by Hanford with a parallel account of civilians downwind of the Nevada atomic test site who suffer from identical radiogenic diseases Against the heartrending details of personal illness and loss and ultimately persistence in the face of a legal system that protects the government on all fronts and at all costs *The Hanford Plaintiffs* draws a damning picture of the failure of the US Congress and the Judiciary to defend the American public and to adequately redress a catastrophic wrong Documenting the legal medical and human cost of one community s struggle for justice this book conveys in clear and urgent terms the damage done to ordinary Americans in the name of business progress and patriotism
