Yielding,2017-11-06 Normal faults are the primary structures that accommodate extension of the brittle crust This volume provides an up to date overview of current research into the geometry and growth of normal faults The 23 research papers present the findings of outcrop and subsurface studies of the geometrical evolution of faults from a number of basins worldwide complemented by analogue and numerical modelling studies of fundamental aspects of fault kinematics The topics addressed include how fault length changes with displacement how faults interact with one another the controls of previous structure on fault evolution and the nature and origin of fault related folding This volume will be of interest to those wishing to develop a better understanding of the structural geological aspects of faulting from postgraduate students to those working in industry *NASA Technical Paper* United States. Investigation of the Effects of Leading-edge Chord-extensions and Fences in Combination with Leading-edge Flaps on the Aerodynamic Characteristics at Mach Numbers from 0.40 to 0.93 of a 45 Degree Sweptback Wing of Aspect Ratio 4 Kenneth P. Spreemann,1957 This investigation was made to determine the effects of 6 degree full span and 3 degree partial span leading edge flaps in combination with chord extensions or fences on the aerodynamic characteristics of a wing fuselage configuration with a 45 degree sweptback wing of aspect ratio 4 taper ratio 0.3 and NACA 65A006 airfoil sections The investigation was made in the Langley high speed 7 by 10 foot tunnel over a Mach number range of 0.40 to 0.93 and an angle of attack range of about 2 degrees to 24 degrees Lift drag and pitching moment data were obtained for all configurations From overall considerations of stability and performance it appears that with the model of this investigation the 6 degree full span leading edge flaps in combination with the chord extension over the outboard 35 percent of the span with or without leading edge camber would be the most desirable configuration
