The Metabolic Syndrome and Obesity

George A. Bray,2008-01-23 Thirty years ago I published my first monograph on obesity Bray 1976 Many things have changed in these 30 years but many have remained the same Preparation of The Metabolic Syndrome and Obesity has given me a chance to survey the changes to the field and to present an update of the scientific information In retrospect I conclude that a major component of the current epidemic of overweight is not medical not genetic not psychological and will not be effectively treated by lifestyle changes that require individual choices We are all influenced by the prices of the goods we buy With the reduction in food prices and distortion of commercially profitable products resulting from federal subsidies of corn sugar and rice the food industry has been able to produce cheap good tasting energy dense foods and can sell them cheaply in large portion sizes In contrast foods like fruits and vegetables receive little in the way of subsidies and are thus more expensive thus we buy less Providing more healthy food alternatives as some advocate will put items with higher costs on the shelves and is in my view unlikely to alter consumer choices as long as good tasting energy dense foods remain cheap HISTORICAL CONTEXT FOR OBESITY Obesity was already a problem before my first monograph was published Between the writing of that monograph and The Metabolic Syndrome and Obesity I was fortunate enough to find a short book in French written by an American from Cincinnati named Worthington

Estimated Number of Days' Supply of Food and Beverages in Establishments that Serve Food for On-premise Consumption Gino J. Mangialardi, Gordon J. Flynn, Herbert Holms Moede, Joseph Raymond Potter, Jules V. Powell, Martin Kriesberg, Michael G. Van Dress, Rex Elijah Childs, William J. Bramlage, 1965 Nutritionism Gyorgy Scrinis, 2013-06-18 Popularized by Michael Pollan in his best selling *In Defense of Food* Gyorgy Scrinis's concept of nutritionism refers to the reductive understanding of nutrients as the key indicators of healthy food an approach that has dominated nutrition science dietary advice and food marketing Scrinis argues this ideology has narrowed and in some cases distorted our appreciation of food quality such that even highly processed foods may be perceived as healthful depending on their content of good or bad nutrients Investigating the butter versus margarine debate the battle between low fat low carb and other weight loss diets and the food industry's strategic promotion of nutritionally enhanced foods Scrinis reveals the scientific social and economic factors driving our modern fascination with nutrition Scrinis develops an original framework and terminology for analyzing the characteristics and consequences of nutritionism since the late nineteenth century He begins with the era of quantification in which the idea of protective nutrients caloric reductionism and vitamins curative effects took shape He follows with the era of good and bad nutritionism which set nutricentric dietary guidelines and defined the parameters of unhealthy nutrients and concludes with our current era of functional nutritionism in which the focus has shifted to targeted nutrients superfoods and optimal diets Scrinis's research underscores the critical role of nutrition science and dietary advice in shaping our relationship to food and our bodies and in heightening our nutritional anxieties He ultimately shows how nutritionism has aligned the demands and perceived needs of consumers with the commercial interests of food manufacturers and corporations Scrinis also offers an alternative paradigm for assessing the healthfulness of foods the food quality paradigm that privileges food production and processing quality cultural traditional knowledge and sensual practical experience and promotes less reductive forms of nutrition research and dietary advice
