Cromack,2021-08-28 This book is a first of its kind unique atlas that synthesizes a full review of both upper and lower extremity reconstructive options in one text While there are books that concentrate on local soft tissue coverage and other books that discuss all types of free flaps this book features

a full scope and provides the full spectrum of reconstructive options. It features high quality pictures and made just for this text illustrations created by reconstructive surgeons with intimate knowledge of the procedures. This atlas includes a detailed description of each flap and presents high quality pictures and graphics explaining relevant anatomy. Each chapter offers case presentations accompanied by explanations that describe why doctors select specific reconstructive options. This guides the readers on how to discern which flap to choose in which situation. Comprehensive Atlas of Upper and Lower Extremity From Primary Closure to Free Tissue Transfer offers a comprehensive tool for plastic surgeons, orthopedic surgeons and some general surgeons who perform simple soft tissue coverage. *Contemporary Approach to Lower Extremity Reconstruction, an Issue of Clinics in Plastic Surgery, Volume 48-2* Lee L. Q. Pu, 2021-04-28. This issue Clinics in Plastic Surgery guest edited by Dr Lee L Q Pu is dedicated to Contemporary Approach to Lower Extremity Reconstruction. Topics in this issue include but are not limited to: locoregional flaps, free flaps, propeller flaps, perforator plus flaps, local free style perforator flaps, free style free perforator flaps, anterolateral thigh perforator flap, superficial circumflex iliac artery perforator flap, medial sural artery perforator flap, optimal timing of traumatic lower extremity reconstruction, management of Gustilo Type IIIC injuries, orthoplastic approach, functional restoration, lower extremity reconstruction after soft tissue sarcoma resection, super microvascular free tissue transfers to lower extremity and lower extremity reconstruction for limb salvage. Advances in Upper and Lower Extremity Microvascular Reconstructions Frédéric Schuind, 2002. Advances made in microsurgical techniques during the last three decades have dramatically improved the treatment of complex limb injuries such as a closed fracture covered by healthy tissue and a complex open fracture of the tibia. Microvascular transfers from the foot have revolutionized the treatment of digital amputations and vascularized bone transfers are used in various indications. The microvascular techniques are still evolving. Many imaginative new flaps are being proposed to meet precisely the functional requirements of the various defects. Alternative anastomotic techniques are being investigated and the no flow phenomenon has been extensively studied. Allotransplantation may be feasible in the future. This unique book is a result of the exchange of ideas among clinicians of various specialties noted for their innovations and basic researchers involved with the problems of microvascular reconstruction of upper and lower extremities. While most of the chapters are invited contributions, some are based on presentations made during an international symposium held in Brussels, Belgium in 1997. **Current Concepts on Lower Extremity Reconstruction** Salvatore D'Arpa, Francesco Moschella, 2017. *Lower Extremity Complex Trauma and Complications, An Issue of Clinics in Podiatric Medicine and Surgery* John J.
