atoms The world of Epicurus does not need a divine creator or any divine intervention Lucretius argues that the gods exist but that they have nothing to do with our world or the humanity The philosophy is practically atheistic and as such it was suppressed during the Middle Ages From Epicurus own hand only a few fragments and letters managed to survive the Middle Ages Therefore it was a major event when the humanist Poggio Bracciolini discovered Lucretius forgotten poem in a German monastery in 1417 For philosophers and intellectual innovators of the Renaissance there were suddenly an original and sophisticated system as an alternative to the natural philosophy of Plato and Aristotle taught in scholastic Europe De rerum natura was what may be described as a bible for the scientific revolution The idea of atoms the infinite universe and the plurality of worlds and that mechanical cause and effect lies behind every natural phenomenon all this was expressed here Also Galileo s laws of motion are in their infancy in the poem centuries before Christ Epicurus and Lucretius already understood that an object in motion will continue to move forever unless something intervene and that a heavy object does not fall faster than a light one De rerum natura is considered to provide a fairly unadulterated picture of the Epicurean philosophy since the differences are insignificant when compared to Epicurus own fragments and letters It is published here in a classic 1916 translation by the American poet William Ellery Leonard 1876 1944 **Selections from Lucretius** Titus Lucretius Carus,1889
