Tice, 2012-03-09 Universities are unlikely venues for grading bodies beauty poise and style Nonetheless thousands of college women have sought not only college diplomas but campus beauty titles and tiaras throughout the twentieth century and the cultural power of beauty pageants continues into the twenty first In *Queens of Academe* Karen W Tice asks how and why does higher education remain in the beauty and body business and with what effects on student bodies and identities Drawing on archival research and interviews as well as hundreds of hours observing college pageants on predominantly black and white campuses Tice argues the pageants help to illuminate the shifting iterations of class race religion culture sexuality and gender braided into campus rituals and student life Moving beyond a binary of objectification versus empowerment Tice offers a nuanced analysis of the making of idealized collegiate masculinities and femininities and the stylization of higher education itself **The Journal of the Assembly During the ... Session of the Legislature of the State of California** California. Legislature. Assembly, 1977 **History and Memory in the Dead Sea Scrolls** Travis B. Williams, 2019-05-16 Charts a new methodological course in Dead Sea Scrolls scholarship by employing memory theory to inform historical research This is an instructive resource for scholars who are seeking an alternative to currently constructed approaches to the subject and will be of appeal to those interested in the Dead Sea Scrolls more generally **Making Empire** Jane Ohlmeyer, 2023-10-10 Ireland was England's oldest colony Making Empire revisits the history of empire in Ireland in a time of Brexit the culture wars and the campaigns around Black Lives Matter and Statues must fall to better understand how it has formed the present and how it might shape the future Empire and imperial frameworks policies practices and cultures have shaped the history of the world for the last two millennia It is

nation states that are the blip on the historical horizon Making Empire re examines empire as process and Ireland s role in it through the lens of early modernity It covers the two hundred years between the mid sixteenth century and the mid eighteenth century that equate roughly to the timespan of the First English Empire c 1550 c 1770s Ireland was England s oldest colony How then did the English empire actually function in early modern Ireland and how did this change over time What did access to European empires mean for people living in Ireland This book answers these questions by interrogating four interconnected themes First that Ireland formed an integral part of the English imperial system Second that the Irish operated as agents of empire s Third Ireland served as laboratory in and for the English empire Finally it examines the impact that empire s had on people living in early modern Ireland Even though the book s focus will be on Ireland and the English empire the Irish were trans imperial and engaged with all of the early modern imperial powers It is therefore critical where possible and appropriate to look to other European and global empires for meaningful comparisons and connections in this era of expansionism What becomes clear is that colonisation was not a single occurrence but an iterative and durable process that impacted different parts of Ireland at different times and in different ways That imperialism was about the exercise of power violence coercion and expropriation Strategies about how best to turn conquest into profit to mobilise and control Ireland s natural resources especially land and labour varied but the reality of everyday life did not change and provoked a wide variety of responses ranging from acceptance and assimilation to resistance This book based on the 2021 James Ford Lectures Oxford University suggests that the moment has come revisit the history of empire if only to better understand how it has formed the present and how this might shape the future
