Maya Sb Ancient Civilizations:

Ancient Maya Arthur Demarest, 2004-12-09 In this new archaeological study Arthur Demarest brings the lost pre Columbian civilization of the Maya to life In applying a holistic perspective to the most recent evidence from archaeology paleoecology and epigraphy this theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life Demarest draws on his own discoveries and the findings of colleagues to reconstruct the complex lifeways and volatile political history of the Classic Maya states of the first to eighth centuries He provides a new explanation of the long standing mystery of the ninth century abandonment of most of the great rain forest cities Finally he draws lessons from the history of the Classic Maya cities for contemporary society and for the ongoing struggles and resurgence of the modern Maya peoples who are now re emerging from six centuries of oppression *The Technology of Maya Civilization* Zachary X. Hruby, Geoffrey E. Braswell, Oswaldo Chinchilla Mazariegos, 2014-10-14 The ancient Maya shaped their world with stone tools Lithic artifacts helped create the cityscape and were central to warfare and hunting craft activities cooking and ritual performance The Technology of Maya Civilization examines Maya lithic artefacts made of chert obsidian silicified limestone and jade to explore the relationship between ancient civilizations and natural resources The volume presents case studies of archaeological sites in Guatemala Mexico Belize and Honduras The analysis draws on innovative anthropological theory to argue that stone artefacts were not merely cultural products but tools that reproduced modified and created the fabric of society The Oxford Handbook of the Archaeology of Ritual and Religion Timothy Insoll, 2011-10-28 The Oxford Handbook of the Archaeology of Ritual and Religion provides a comprehensive overview by period and region of the relevant archaeological material in relation to theory methodology definition and practice Although as the title indicates the focus is upon archaeological investigations of ritual and religion by necessity ideas and evidence from other disciplines are also included among them anthropology ethnography religious studies and history The Handbook covers a global span Africa Asia Australasia Europe and the Americas and reaches from the earliest prehistory the Lower and Middle Palaeolithic to modern times In addition chapters focus upon relevant themes ranging from landscape to death from taboo to water from gender to rites of passage from ritual to fasting and feasting Written by over sixty specialists renowned in their respective fields the Handbook presents the very best in current scholarship and will serve both as a comprehensive introduction to its subject and as a stimulus to further research Ancient Maya Political Dynamics Antonia E. Foias, 2013-07-02 Foias argues that there is no single Maya political history but multiple histories no single Maya state but multiple polities that need to be understood at the level of the lived experience of individuals She explores the ways in which the dynamics of political power shaped the lives and landscape of the Maya and how this information can be used to look at other complex societies **The Collapse of Ancient States and Civilizations** Norman Yoffee, George L. Cowgill, 1991-07 Publikacja prac seminarium School of American Research kt re odby

o si w Santa Fe 22 26 marca 1982 r **Perspectives on Ancient Maya Rural Complexity** Samuel V. Connell, Gyles Iannone, 2003-12-01 Settlement archaeology in the Maya area has focused much of its attention on the polar extremes of the settlement continuum As a result of this urban rural bias a whole range of complex rural settlements remain under explored The chapters in this volume highlight the variable quality of these middle level settlements **Ancient Maya Cities of the Eastern Lowlands** Brett A. Houk, 2016-10-05 Brings together for the first time all the major sites of this part of the Maya world and helps us understand how the ancient Maya planned and built their beautiful cities It will become both a handbook and a source of ideas for other archaeologists for years to come George J Bey III coeditor of Pottery Economics in Mesoamerica Skillfully integrates the social histories of urban development Vernon L Scarborough author of The Flow of Power Ancient Water Systems and Landscapes Any scholar interested in urban planning and the built environment will find this book engaging and useful Lisa J Lucero author of Water and Ritual For more than a century researchers have studied Maya ruins and sites like Tikal Palenque Cop n and Chich n Itz have shaped our understanding of the Maya Yet cities of the eastern lowlands of Belize an area that was home to a rich urban tradition that persisted and evolved for almost 2 000 years are treated as peripheral to these great Classic period sites The hot and humid climate and dense forests are inhospitable and make preservation of the ruins difficult but this oft ignored area reveals much about Maya urbanism and culture Using data collected from different sites throughout the lowlands including the Vaca Plateau and the Belize River Valley Brett Houk presents the first synthesis of these unique ruins and discusses methods for mapping and excavating them Considering the sites through the analytical lenses of the built environment and ancient urban planning Houk vividly reconstructs their political history considers how they fit into the larger political landscape of the Classic Maya and examines what they tell us about Maya city building **Animals and Inequality in the Ancient World** Benjamin S. Arbuckle, Sue Ann McCarty, 2015-01-15 Animals and Inequality in the Ancient World explores the current trends in the social archaeology of human animal relationships focusing on the ways in which animals are used to structure create support and even deconstruct social inequalities The authors provide a global range of case studies from both New and Old World archaeology a royal Aztec dog burial the monumental horse tombs of Central Asia and the ceremonial macaw cages of ancient Mexico among them They explore the complex relationships between people and animals in social economic political and ritual contexts incorporating animal remains from archaeological sites with artifacts texts and iconography to develop their interpretations Animals and Inequality in the Ancient World presents new data and interpretations that reveal the role of animals their products and their symbolism in structuring social inequalities in the ancient world The volume will be of interest to archaeologists especially zooarchaeologists and classical scholars of pre modern civilizations and societies *Time and Complexity in Historical Ecology* William Balée, Clark L. Erickson, 2006-06-22 This collection of studies by anthropologists botanists ecologists and biologists is an important contribution to the emerging field of historical ecology The book combines

cutting edge research with new perspectives to emphasize the close relationship between humans and their natural environment Contributors examine how alterations in the natural world mirror human cultures societies and languages Treating the landscape like a text these researchers decipher patterns and meaning in the Ecuadorian Andes Amazonia the desert coast of Peru and other regions in the neotropics They show how local peoples have changed the landscape over time to fit their needs by managing and modifying species diversity enhancing landscape heterogeneity and controlling ecological disturbance In turn the environment itself becomes a form of architecture rich with historical and archaeological significance Time and Complexity in Historical Ecology explores thousands of years of ecological history while also addressing important contemporary issues such as biodiversity and genetic variation and change Engagingly written and expertly researched this book introduces and exemplifies a unique method for better understanding the link between humans and the biosphere

The Bioarchaeology of Space and Place Gabriel D. Wrobel, 2014-04-16 The Bioarchaeology of Space and Place investigates variations in social identity among the ancient Maya by focusing on individuals and small groups identified archaeologically by their inclusion in specific discrete mortuary contexts or by unusual mortuary treatments Utilizing archaeological biological and taphonomic data from these contexts the studies employ a variety of methodological approaches to reconstruct aspects of individuals life course and mortuary pathways Following this specific mortuary behaviors are discussed in relation to their local or regional cultural setting using relevant archaeological ethnohistoric and or ethnographic data in an effort to interpret their meaning within the broader social political and economic contexts in which they were carried out This volume covers a number of topics that are currently being debated in Maya archaeology including identification and discussion of the role and extent of human sacrifice in Maya culture the use of ancestors for maintaining political power the mortuary use of caves by both elites and non elites ethnic distinctions within urban areas and the extent of movement of people between communities Importantly the papers in this volume attempt to test and move beyond static dichotic categories that are often employed in mortuary studies in an effort to better understand the complex ways in which the Maya conceptualized and manipulated social identity This type of nuanced case study approach that incorporates historical archaeological and theoretical contextualization is becoming increasingly important in the field of bioarchaeology providing valuable sources of data where small diverse samples impede populational approaches

Maya E Groups David A. Freidel, Arlen F. Chase, Anne S. Dowd, Jerry Murdock, 2017-08-08. E groups are not the fifth element but a group of structures in the temple complexes of Classic Maya City centers. In this volume from distinguished researchers of the Classic period, the E groups prove to be more than just records of the sun's passages through the years.

Maya Wisdom and the Survival of Our Planet Lisa Joyce Lucero, 2025. We now live in the Anthropocene, the first epoch of our own making. We have altered the Earth's atmosphere, landscapes, and bodies of water. The burning of fossil fuels has warmed the planet enough to change weather patterns, melt glaciers, and raise sea levels, a situation made worse by rampant deforestation and resource depletion. Many look to governments to confront these existential challenges. In *Maya Wisdom and the Survival of Our Planet*, Lisa Lucero looks to the Maya past and present. Through the lens of the traditional Maya inclusive worldview, one in which humans are part of the world, not separate from it, and where everything is connected, Lucero provides a practical roadmap on how to sustainably address climate change and environmental degradation. She shows how the Maya collaborate with, rather than try to subjugate, forests, animals, soils, water, and other nonhuman entities. The Maya sustainably farmed for millennia and provided goods, labor, and services to their kings in cities. In return, kings performed vital ceremonies to the Rain God Chahk, other gods, and ancestors to replenish urban reservoirs that lasted throughout the long dry season, a balancing act that worked for over 1,000 years. Lucero shows how approaches to tackle climate change from the bottom up, beginning with the family or household, are just as important as top-down governmental mitigation, and how learning from traditional knowledge is vital for the survival of us all. She brings to life the tropical jungles of Central America and reveals the valuable solutions its ancient and contemporary inhabitants offer us to save our planet.
