Atlas 2005 World Health Organization. Department of Mental Health and Substance Abuse, World Health Organization. Mental Health Evidence and Research Team, 2005 This atlas is aimed at collecting, compiling, and disseminating information on mental health resources in the world. It presents updated and expanded information from 192 countries with analyses of global and regional trends as well as individual country profiles. Newly included in this volume is a section on epidemiology within the profiles of all low and middle income countries. It shows that mental health resources within most countries remain inadequate despite modest improvements since 2001. Availability of mental health resources across countries and between regions remains substantially uneven with many countries having few resources. The atlas reinforces the urgent need to enhance mental health resources within countries.

Handbook of Community Psychiatry Hunter L. McQuiston, Wesley E. Sowers, Jules M. Ranz, Jacqueline Maus Feldman, 2012-06-05 During the past decade or more there has been a rapid evolution of mental health services and treatment technologies shifting psychiatric epidemiology, changes in public behavioral health policy, and increased understanding in medicine regarding approaches to clinical work that focus on patient centeredness. These contemporary issues need to be articulated in a comprehensive format. The American Association of Community Psychiatrists (AACP), a professional organization internationally recognized as holding the greatest concentration of expertise in the field, has launched a methodical process to create a competency certification in community psychiatry. As a reference for a certification examination, that effort will benefit enormously from a comprehensive handbook on the subject.
