National Psychology In International Relations:

National Psychology In International Relations Franz Winkler, 1991 National Psychology in International Relations Franz E. Winkler, 1976-01-01 *National Psychology in International Relations* Franz Emil Winkler, 1956 *The Geopsychology Theory of International Relations in the 21st Century* B. M. Jain, 2021-02-15 This book introduces an innovative theoretical construct of geopsychology to navigate the complex dynamics of international politics in the 21st century. It explains how geopsychology is different from mainstream international relations theories in terms of primary actors, human behavior, spatial application, instruments, and key issues. It argues that peace and stability in the troubled parts of the world warrants an imperative need for understanding psychological dispositions of non-state actors and authoritarian regimes. In *The Geopsychology Theory of International Relations in the 21st Century: Escaping the Ignorance Trap*, B. M. Jain unfolds that neither a global hegemon nor a cohort of powers could weaken their resolve and break their morale as proven in the cases of Iraq, Afghanistan, and North Korea. Importantly, the regional case studies of India and Pakistan in South Asia, North Korea and China in Northeast Asia, and the U.S. involvement in the Middle East reveal how the psyche and thought processes of national and regional actors have been the driving force in triggering interstate conflicts and civil wars. The book brilliantly illuminates how America became a conscious victim of the ignorance trap in Asia's volatile regions. This must-book offers easy solutions to complex conflicts to induce a peaceful change in world politics.

China's International Relations Harley Farnsworth MacNair, 1926 **Non-Western Theories of International Relations** Alexei D. Voskressenski, 2016-12-16 This book addresses the problem of World Regional Studies and its components: regional complexes, regional subsystems, and global regions. With an increasingly complex international system and the emergence of new actors, it is clear that the conceptual framing within the classical disciplines of IR, Political Theory, International Political Economy, or Comparative Politics can no longer fully explain a number of processes originating from a tighter and intricate nexus between local, regional, and global dimensions. World Regional Studies explains the emergence of new phenomena in international relations and world politics on a regional and predominantly non-Western regional level. How do non-Western societies react to the transformations of the global order? Is a non-Western democracy possible? Should we discuss the possibilities for the appearance of a non-Western IR theory or a new framework for analyzing de-westernized global development? This study, based on decade-long research and teaching post in World Regional Studies at MGIMO University and Russian University of Humanitarian Studies (RGGU), seeks to answer these questions.

Rudolf Steiner's Vision of Love Bernard Nesfield-Cookson, 1999 The author encapsulates Steiner's revelations on the meaning of love and indicates the supreme importance of the greatest of all deeds of love: the Mystery of Golgotha.

International Relations Theory and the Asia-Pacific G. John Ikenberry, Michael Mastanduno, 2003-05-21 What will the Asia-Pacific rim look like in the years ahead? What tools will international relations theorists need to understand the complex relationship among China, Japan, and the

United States as the three powers shape the economic and political future of this crucial region. Some of the best and most innovative scholars in international relations and Asian area studies gather here with the working premise that stability in the broader Asia Pacific region is in large part a function of the behavior of and relationships among these three major powers. Each author analyzes the foreign policy behavior of one or more of these states and or relations among them in an effort to make claims about the prospects for regional stability. Some of the chapters focus on security relationships, some on economic relations and some on the interaction of the two. The authors do not promote any particular theoretical perspective but instead draw on the full diversity of theoretical approaches in contemporary international relations scholarship to illuminate international interactions among the Pacific powers. The creative collaboration of international relations and Asian studies specialists presents the opportunity to assess the applicability of Western categories of analysis to the beliefs and behaviors of Asian actors. The scholars in this volume share the conviction that a deeper understanding of the effects of cultural divides between Asian and American policymakers is essential if the Pacific rim's economic and regional security is to be safeguarded.

The Soviet Study of International Relations Allen Lynch, 1989-07-28. Current divergence from traditional Leninist orthodoxy is attributed to such phenomena as nuclear warfare, continued Western prosperity and the Sino-Soviet split according to this systematic analysis of Soviet foreign policy.

Handbook of International Relations Walter Carlsnaes, Thomas Risse, Thomas Risse-Kappen, Beth A Simmons, 2002. NEW IN PAPERBACK FEBRUARY 2005. The most systematic and wide ranging survey of the multi faceted field of International Relations yet produced. It is sure to become a standard reference work and teaching text and is unlikely to be superseded at any time in the near future. It should be considered as essential reading. International Affairs. The Handbook of International Relations published 2002 in hardback quickly established itself as the benchmark volume providing a state of the art review and indispensable guide to the study of international relations. It is now released in paperback in order to be accessible to students in classroom use. The first part introduces the major approaches within the field and unpacks many of the on going debates within the discipline including those between rationalist and constructivist approaches. The second part moves on to explore the key concepts and contextual factors important to the subject from concepts like the state and power to international and transnational actors, debates around globalization and contending feminist perspectives. The final part reviews a number of the key substantive issues in international relations and is designed to complement the analytical tools and perspectives presented in Parts I and II. Examples of the many topics included are foreign policy, war and peace, security, nationalism and ethnicity, finance, trade, development, the environment and human rights.
