Nato Enlargement Illusions And Reality:

NATO Enlargement Ted Galen Carpenter, Barbara Conry, 1998 The decision to expand NATO eastward is a fateful venture that has received surprisingly little public attention Advocates of enlargement insist that the step will foster cooperation consolidate democracy and promote stability throughout Europe But the contributors to this volume conclude that an expanded NATO is a dubious potentially disastrous idea Instead of healing the wounds of the Cold War it threatens to create a new division of Europe and undermine friendly relations with Russia Even worse it will establish expensive dangerous and probably unsustainable security obligations for the United States

NATO Enlargement Ted Galen Carpenter, 1998 NATO enlargement reflects a failure on the part of policymakers to recognize new strategic realities and that failure could have dangerous unintended consequences

The Future of NATO Expansion Zoltan Barany, 2003-07-21 In 1999 three East Central European states Poland Hungary and the Czech Republic gained membership in the North Atlantic Treaty Organization Professor Barany argues that once it began the Alliance should continue the enlargement process Nevertheless he maintains that only states that satisfy NATO's membership criteria should be allowed to join Through an extensive analysis of four countries Bulgaria Romania Slovakia and Slovenia who at the time of the book's original publication in 2003 were NATO aspirants Barany demonstrates that they were in several important respects unprepared for membership and that there was no pressing reason for NATO's haste Barany argues that while NATO should be clear that its doors remain open to qualified candidates the Alliance should hold off further expansion until prospective members will become assets rather than liabilities

NATO Enters the 21st Century Ted Galen Carpenter, 2001 NATO's military intervention in Yugoslavia highlights the choices and problems confronting the alliance as it approaches the new century Is NATO suited to playing such a role or is the alliance a Cold War anachronism

NATO Expansion and US Strategy in Asia H. Gardner, 2013-11-12 Surmounting the Global Crisis critiques the impact of NATO enlargement and the US pivot to Asia on both the Russia and China and examines how these dual US backed policies may influence key countries in the Euro Atlantic wider Middle East and Indo Pacific regions in general

Explaining NATO Enlargement Robert W. Ruchhaus, 2013-01-11 This work evaluates the pros and cons of NATO enlargement It explains why NATO offered membership to three of its Cold War adversaries and makes recommendations about which countries if any should be offered membership in the future

The Power Problem Christopher A. Preble, 2011-05-15 Numerous polls show that Americans want to reduce our military presence abroad allowing our allies and other nations to assume greater responsibility both for their own defense and for enforcing security in their respective regions In *The Power Problem* Christopher A Preble explores the aims costs and limitations of the use of this nation's military power throughout he makes the case that the majority of Americans are right and the foreign policy experts who disdain the public's perspective are wrong Preble is a keen and skeptical observer of recent U S foreign policy experiences which have been marked by the promiscuous use of armed intervention He documents

how the possession of vast military strength runs contrary to the original intent of the Founders and has as they feared shifted the balance of power away from individual citizens and toward the central government and from the legislative and judicial branches of government to the executive In Preble s estimate if policymakers in Washington have at their disposal immense military might they will constantly be tempted to overreach and to redefine ever more broadly the national interest Preble holds that the core national interest preserving American security is easily defined and largely immutable Possessing vast military power in order to further other objectives is he asserts illicit and to be resisted Preble views military power as purely instrumental if it advances U S security then it is fulfilling its essential role If it does not if it undermines our security imposes unnecessary costs and forces all Americans to incur additional risks then our military power is a problem one that only we can solve As it stands today Washington s eagerness to maintain and use an enormous and expensive military is corrosive to contemporary American democracy

The Ukraine War & the Eurasian World Order Glenn Diesen,2024-02-15

Five hundred years of Western hegemony has ended while the global majority s aspiration for a world order based on multipolarity and sovereign equality is rising This incisive book addresses the demise of liberal hegemony though pointing out that a multipolar Westphalian world order has not yet taken shape leaving the world in a period of interregnum A legal vacuum has emerged in which the conflicting sides are competing to define the future order NATO expansionism was an important component of liberal hegemony as it was intended to cement the collective hegemony of the West as the foundation for a liberal democratic peace Instead it dismantled the pan European security architecture and set Europe on the path to war without the possibility of a course correction Ukraine as a divided country in a divided Europe has been a crucial pawn in the great power competition between NATO and Russia for the past three decades The war in Ukraine is a symptom of the collapsing world order The war revealed the dysfunction of liberal hegemony in terms of both power and legitimacy and it sparked a proxy war between the West and Russia instead of ensuring peace the source of its legitimacy The proxy war unprecedented sanctions and efforts to isolate Russia in the wider world contributed to the demise of liberal hegemony as opposed to its revival Much of the world responded to the war by intensifying their transition to a Eurasian world order that rejects hegemony and liberal universalism The economic architecture is being reorganised as the world diversifies away from excessive reliance on Western technologies industries transportation corridors banks payment systems insurance systems and currencies Universalism based on Western values is replaced by civilisational distinctiveness sovereign inequality is swapped with sovereign equality socialising inferiors is replaced by negotiations and the rules based international order is discarded in favour of international law A Westphalian world order is reasserting itself although with Eurasian characteristics The West s defeat of Russia would restore the unipolar world order while a Russian victory would cement a multipolar one The international system is now at its most dangerous as the prospect of compromise is absent meaning the winner will take all Both NATO under US direction and Russia are therefore prepared to take great risks and escalate making

nuclear war increasingly likely Republic, Not an Empire Patrick J. Buchanan, 2013-02-05 All but predicting the September 11 attack on the World Trade Center Buchanan examines and critiques America's recent foreign policy and argues for new policies that consider America's interests first Transforming NATO Ivan Dinev Ivanov, 2011-07-16 Transforming NATO New Allies Missions and Capabilities by Ivan Dinev Ivanov examines the three dimensions of NATO's transformation since the end of the Cold War the addition of a dozen new allies the undertaking of new missions such as peacekeeping crisis response and stabilization and the development of new capabilities to implement these missions The book explains these processes through two mutually reinforcing frameworks club goods theory and the concept of complementarities NATO can be viewed as a diverse heterogeneous club of nations providing collective defense to its members who in turn combine their military resources in a way that enables them to optimize the Alliance's capabilities needed for overseas operations Transforming NATO makes a number of theoretical contributions First it offers new insights into understanding how heterogeneous clubs operate Second it introduces a novel concept that of complementarities Finally it re-evaluates the relevance of club goods theory as a framework for studying contemporary international security These conceptual foundations apply to areas well beyond NATO They provide useful insights into understanding the operation of transatlantic relations alliance politics and a broader set of international coalitions and partnerships This update in April 2013 covers new developments related to NATO's transformation after this book was originally published http://homepages.uc.edu/ivanovid/pdfs/book_update.pdf
