Xiong, Zhencheng Hu, 2009-12-14. The market demands for skills knowledge and personalities have positioned robotics as an important field in both engineering and science. To meet these challenging demands robotics has already seen its success in automating many industrial tasks in factories. And a new era will come for us to see a greater success of robotics in industrial environments. In anticipating a wider deployment of intelligent and autonomous robots for tasks such as manufacturing eldercare homecare edutainment search and rescue de mining surveillance exploration and security missions it is necessary for us to push the frontier of robotics into a new dimension in which motion and intelligence play equally important roles. After the success of the inaugural conference the purpose of the Second International Conference on Intelligent Robotics and Applications was to provide a venue where researchers scientists engineers and practitioners throughout the world could come together to present and discuss the latest achievement future challenges and exciting applications of intelligent and autonomous robots.
